Background:

As part of the Fiscal Year 2024 budget, Growth Management requested new server infrastructure as the exiting server for geographic information systems is aging rapidly. Growth Management has worked with Information Technology to identify the best server solution and determined that using online cloud computing rather than on-premises physical servers better suits the County's needs. This contract with AWS will allow the County to set up necessary server infrastructure to modernize the County's GIS capabilities.

This purchase is exempt from the County's competitive bidding requirements pursuant to Section 22.3-302 (13) of the Alachua County Procurement Code, Procurement of Supplies or Services under

Contract with cooperatives, including cooperatives that the County participates in accordance with Article 10, Section 22.10-201 (Cooperative Purchasing Authorized), providing the vendor extends the same terms and conditions of the Contract to the County; however, since the dollar amount of the purchase exceeds the purchasing authority of the Procurement Manager, this is being submitted for Board consideration and approval.
