**Executive Summary**

Due to a reduction in staff and increased caseloads for pretrial supervision, Court Services is exploring innovative ways to supervise pretrial defendants. Placing defendants on MonitorConnect will allow Court Services to better manage these larger caseloads and will allow the defendants the opportunity to call at a time most convenient to them while still maintaining defendant accountability.

**Background**

On September 12, 2006, the Board approved the purchase of Loryx Systems, a supervision software for community correction agencies. MonitorConnect is an addition to the original software. This addition is an innovative web and phone based collection of supervision services including automated appointment reminders, on-line and phone offender reporting, offender on demand access to information including agency forms and documents, and networking of social service agencies. With MonitorConnect, offenders can answer agency configurable questions, update their address and employment information, and send and receive messages from their case managers.
