

JOHN SLY GRANT WRITING SERVICES

Overview

I offer several different options and levels of services to assist your Fire Company, EMS Agency, or Police Department in obtaining much needed funding. This allows you to concentrate on training and job performance rather than fundraising or budgeting for the items you need to do your job.

Fortunately, there are several programs out there that offer funds, training, and equipment to emergency services providers. Allow me to advise you when grant opportunities arise that may be beneficial to your organization, counsel you on what types of applications stand the best opportunity of being funded, file grant applications on behalf of your organization, and complete all of the follow up paperwork necessary to maintain the scope of performance during the grant period.

As a Past Fire Chief, Past EMS Chief, Fire Marshal, and Emergency Management Coordinator, I know the demands of the job and the frustrations in obtaining funds to keep operating. I also understand the difficulty in justifying the expense of a grant writer when most grants are competitive programs that may or may not be funded. I have reviewed the costs of many professional grant-writing services and have been astonished at some of the fees that are charged to assist a volunteer or mostly volunteer non-profit organization. As a firefighter, I aim to be different; charging minimal fees in comparison simply to cover the costs of administration, travel expenses, and time in assisting an agency file a successful application.

The 2020 Federal Assistance to Firefighters Grant Program has just completed award recommendations and notifications. In Fiscal Year 2020, I am pleased to report that over 94% of the applications I filed which passed the preliminary screening were funded! In fact, 24% of all funding awarded to Pennsylvania were clients of my services.

At the request of many clients, I have provided a highlight of previous grant awards in recent years on the following pages.
