David Lykens
Rescue Lieutenant
Alachua County Fire Rescue
15040 NW US HWY 441
Alachua FL 32615

Mr Lykens:

Thank you for the opportunity to provide a mobile clinic to your organization. This letter is to provide a justification for sole source procurement.

Historically mobile clinics such as the vehicle you are considering have been custom built from the ground up. TESCO Specialty Vehicles (TSV) has revolutionized the industry by developing a standardized vehicle platform based on a bus body shell.

Our products are developed by building a steel cage body shell on a Ford E-Series cutaway chassis. This steel cage is built to FMVSS standards for bus bodies. There are no other known manufacturers that build mobile clinics in the same manner. All other known mobile clinic manufacturers start with either a cargo box body or a consumer based recreational vehicle body. Our vehicle, being built using a bus body, is in a completely different class than the cargo box or consumer based recreational vehicle body based mobile clinics. This is the primary reason that there is no other vehicle in the industry to compare with our proposed vehicle.

Attached to this letter is our body cage construction drawings which show the unique bus body shell design.

We appreciate the opportunity to work with you on this procurement. Should you have questions please feel free to reach out to Ben Connors at bconnors@tescobus.com , 419-720-7433 or myself at jpappas@tescobus.com or 419-720-7451.

Sincerely,

Jeff Pappas
TESCO Vice-President
