Background:

The Florida Department of Transportation is working on a project in the City of Newberry constructing one-way pairs with State Road 26 Eastbound and NW 1st Avenue Westbound.

As a part of this project a roundabout will be constructed at the intersection of CR 337 and State Road 26.

The FDOT Design Manual restricts driveways from occurring within a certain distance of roundabout crosswalks. Ownership of this portion of County Road 337 will allow FDOT to design the roundabout crosswalks to meet the design manual standards.
