Report of Phase I Environmental Site Assessment  
**Sunrise Residence Inn**  
Gainesville, Alachua County, Florida  
GSE Project No. 16612A

GSE Engineering & Consulting, Inc. (GSE) is pleased to present this Report of Phase I Environmental Site Assessment (Phase I ESA) for the above-referenced property located in Gainesville, Alachua County, Florida.

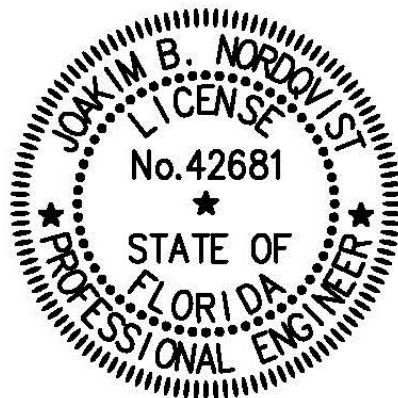

This assessment was performed in general accordance with our Proposal No. 2024-312 dated May 15, 2024. You provided authorization for our services.

GSE appreciates the opportunity to be of service to you with this matter. If you have any questions concerning the contents of this report, or if we may be of further assistance, please call.

Sincerely,

**GSE Engineering & Consulting, Inc.**

## EXECUTIVE SUMMARY

GSE Engineering & Consulting, Inc. (GSE) has completed a Phase I Environmental Site Assessment (Phase I ESA) for the Sunrise Residence Inn property located in Gainesville, Alachua County, Florida. The subject property consists of three (3) adjacent parcels situated south of the SW 21<sup>st</sup> Avenue and SW 14<sup>th</sup> Street intersection. Exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

### **Site Reconnaissance Summary**

Alachua County Property Appraiser (ACPA) Parcel No. 15552-005-000 is developed with an approximately 8,500-square foot, 2-story apartment building. ACPA Parcel No. 15552-002-000 is developed with an approximately 5,900-square foot, 2-story apartment building. The parcel has paved parking on the west portion of the site. ACPA Parcel No. 15552-006-000 is an undeveloped mostly wooded parcel

The building on Parcel No. 15552-005-000 includes twenty-one (21) 1-bedroom, 1-bathroom apartments with kitchenettes, one (1) laundry room, one (1) maintenance room, one (1) storage room, and one (1) boiler room.

The laundry room includes three (3) washers and three (3) dryers. One (1) floor drain was observed near the center of the room. Inside the back of the laundry room is the maintenance room. Within the maintenance room were miscellaneous parts and tools, and numerous chemical and petroleum containers. The storage room is being used for storage of miscellaneous parts and tools, including chemical and petroleum containers. The boiler room is also being used for storage of miscellaneous maintenance items, including chemical and petroleum containers. One (1) floor drain was observed near the center of the room. In addition, the room has an electric water heater for the building.

A utility sink was noted within the maintenance room. The sink is expected to be connected to sanitary sewer. Indications of previous cleaning of paint products is apparent in the sink. Tools and cleaning brushes were also noted within the sink. This incidental cleaning of paint that may have occurred is considered a *de minimus* condition as defined by ASTM 1527, and does not represent a likely environmental concern.

Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers were identified in the various storage areas. The observed storage is typical of and associated with motel/apartment maintenance related activities. No compelling evidence of intentional or accidental spillage of stored chemical and petroleum related products were noted in the above described areas that would represent a likely environmental concern warranting further characterization. Although incidental spillage could conceivably have occurred over the years, the observed conditions are characterized as *de minimis* conditions as defined by the ASTM.

One (1) occupied and three (3) vacant apartments were visited and observed on Parcel No. 15552-005-000. Two (2) vacant apartments were relatively empty. The remaining vacant apartment was under renovation and contained mostly C&D related items, including chemical and petroleum containers. Within the occupied apartment were limited chemical products, consistent with household use. No evidence of spills or leakage was observed with respect to these containers.

The building on Parcel No. 15552-002-000 includes fourteen (14) 1-bedroom, 1-bathroom apartments and one (1) boiler room. Miscellaneous C&D debris attributed to maintenance of the structure was observed inside the boiler room. In addition, the room has a natural gas fueled water heater for the building.

One (1) occupied apartment was visited and observed on Parcel No. 15552-002-000. Within the occupied apartment were limited chemical products, consistent with household use.

Isolated, scattered surface debris and litter was observed across the subject site. In addition, solid waste is collected in one (1) 4-yard refuse container located along the eastern property boundary of Parcel No. 15552-002-000. Multiple garbage cans were also noted on Parcel Nos. 15552-005-000 & 15552-002-000. A majority of observed debris is expected to be associated with apartment tenants and/or maintenance of the building. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

With the exception of the noted surface debris and litter, site observations do not suggest that large scale dumping or landfilling has occurred on-site that would warrant concern. No uncharacteristic conditions or compelling indications of buried materials were encountered during the site visit that would represent a likely environmental concern. The observed debris is considered isolated and interpreted as a *de minimis* condition as defined by the ASTM. Municipalities often have nuisance condition ordinances that require the property owner to remove surface debris. Removal and proper off-site disposal of the surface debris should be considered.

No wells or septic tanks were apparent on-site. The property appears to be connected to municipal water and sanitary sewer. With the exception of observed incidental surface staining, no uncharacteristic odors or other compelling indications to suggest a release of chemicals or petroleum products that would represent a likely environmental concern to the subject site were identified. No indications of petroleum product fueled emergency generators, heaters, or boilers were identified. No direct evidence of existing or former ASTs or USTs was observed.

### **Site Historical Use and Regulatory Information**

Review of the aerial photographs, topographic maps, city directories, and Alachua County Property Appraiser (ACPA) information indicate the site has been in multi-family residential use dating back to at least 1971. City directory listings confirm residential use dating back to at least 1995. City directory listings for the site include *SUNRISE RESIDENCE INN* (2020, 2017, 2014, 2010, 2005) and multiple individual residents dating back to at least 1995. ACPA information indicates the two (2) apartment buildings and associated improvements were constructed in 1971 (Parcel No. 15552-005-000) and 1973 (Parcel No. 15552-002-000), respectively. The buildings are evident in aerial photographs and topographic maps dating back to at least 1971 and 1974, respectively.

Prior to current site improvements, aerial photographs and topographic maps indicate ACPA Parcel No. 15552-005-000 was mostly open pasture with a residential structure dating back to at least 1961. Prior to this, the parcel was mostly open pasture with few scattered trees along the western boundary dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Prior to current site improvements, aerial photographs indicate ACPA Parcel No. 15552-002-000 was a wooded parcel with a residential structure dating back to at least 1956. Prior to this, the parcel was undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

ACPA Parcel No. 15552-006-000 has remained undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Sometime between 1937 and 1949, improvements to the creek located west of the subject site are evident, routing it closer to the western border of the subject site with a north to south alignment. The 1949 aerial image indicates the creek historically adjoined the western border of ACPA Parcel Nos. 15552-002-000 & 15552-006-000. A subsequent aerial photograph dated 1956 shows the creek in its current alignment with additional improvements. It is anticipated that the steep slope observed during our reconnaissance along the west side of the subject site is a result of these improvements (earth moving activities). No borrow pits were identified on the subject site or surrounding areas. No indications of operational areas associated with the adjoining land improvements are evident on the subject site.

With the exception of the creek improvements along the western border of the site between the 1930s and 1950s, overall, no large-scale excavation, clearing, dumping, or filling of the site was indicated on the aerial and topographic information review. Soil survey, topographic, and aerial photograph information do not suggest that borrow pit activities were present on or in the immediate adjoining area of the subject property. There were no indications of large-scale agricultural operations (including buildings, storage, staging, processing areas) being associated with the subject property. Historical site use is not considered a likely environmental concern to the subject site that would warrant further characterization.

The subject site was not identified through the regulatory information review. No historical recognized environmental conditions (HRECs) or controlled recognized environmental condition (CREC) were identified related to the subject site.

### **Off-Site Reconnaissance and Regulatory Information**

The subject site is located within a mostly commercial and residential area. Initial development in the area dates back to at least the 1890s. Additional development has occurred over the years.

Commercial development is evident in historical aerial photographs and topographic maps dating back to at least the 1940s. Residential development is evident dating back to at least the 1890s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1890s. City directory listings confirm development in the immediate area dating back to at least 1955.

The US Highway 441 (US-441) corridor to the east is evident in historical aerial photographs and topographic maps dating back to at least the 1930s. Improvements (widening) to the road are evident in the 1950s. The SW 16<sup>th</sup> Avenue corridor to the north is evident dating back to at least the 1970s. Bivens Arm Lake is located southwest of the subject site.

Multiple off-site regulated facilities were identified in the area. This included **DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)** corresponding to a former commercial retail center tenant adjoining the east side of ACPA Parcel No. 15552-005-000. This facility was listed on the EDR Hist Cleaner database. The facility was not identified on the FDEP dry cleaners or priority cleaners lists.

The tenant name suggests dry cleaning was formerly conducted at this location. No regulatory listings, discharges, or complaints were identified in association with the site. The retail center was constructed in 1974 according to ACPA information. This appears consistent with the historical aerial photograph review. The drycleaner was listed in 1975 but not in 1974 or 1976-78. This suggests the facility was present for less than 2 years. Historical use of chlorinated solvents by the former drycleaners could conceivably pose as a potential environmental concern in regards to the subject site. However, considering the short length of time the dry cleaner was in operation, and our experience with similar sites, this listing is not expected to represent a likely environmental concern that would warrant further characterization.

Considering the regulatory information reviewed, locations with respect to the subject site, and interpreted business activity, the off-site listed facilities do not represent a likely environmental concern to the subject site that would warrant further characterization.

### **Vapor Encroachment Screening**

A Vapor Encroachment Screening (VES) evaluation was performed to characterize the site and evaluate if the nearby sites of concern are likely to result in vapor encroachment onto the subject site. The EDR VES identified multiple facilities within the minimum search distance, including a former dry cleaner and gasoline service station adjoining the subject site to the east. These facilities were evaluated as part of regulatory information review.

The adjoining historical dry cleaner (**DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)**) and historical auto station (**HARDYS ENCO SERVICE (2106 SW 13<sup>th</sup> ST); DOMINOS PIZZA (2106 SW 13<sup>th</sup> ST)**) listings do not have soil or groundwater impacts associated with the former activities at the facility. Therefore, these facilities do not represent a likely environmental concern related to migrating vapors at the subject site. The former drycleaners that adjoined the site to the east was present for less than 2 years according to the historical information compiled. Accordingly, this facility is not interpreted to represent a likely environmental concern related to potential for vapor intrusion onto the subject site.

Considering the identified facilities, area physical setting, combined with the historical and regulatory information review, the area may be characterized as having a low potential for vapor encroachment at the subject site.

### **Conclusion**

GSE has completed this Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-21 of the subject property. This assessment has revealed no evidence of recognized environmental conditions in connection with the property that would warrant further evaluation.

## 1.0 INTRODUCTION

GSE Engineering & Consulting, Inc. (GSE) has completed a Phase I Environmental Site Assessment (Phase I ESA) for the Sunrise Residence Inn property located in Gainesville, Alachua County, Florida. The subject property consists of three (3) adjacent parcels situated south of the SW 21<sup>st</sup> Avenue and SW 14<sup>th</sup> Street intersection (Figure 1). Exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

Our services were completed in general accordance with GSE Proposal No. 2024-312 dated May 15, 2024. Michael Richmond, AIA NCARB LEED AP with Brame Heck Architects, Inc. provided authorization for our services on May 23, 2024.

This Phase I ESA was performed at the request of Brame Heck Architects, Inc. as part of due diligence related work related to the potential purchase the subject site by Alachua County. This report has been prepared for the exclusive use of Brame Heck Architects, Inc. under the terms and conditions of our proposal.

GSE declares that, to the best of our knowledge and belief, the professional in responsible charge of this assessment meets the definition of Environmental Professional as defined in §312.10 of the Environmental Protection Agency Code of Federal Regulations. GSE professionals in responsible charge of this assessment have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. GSE has developed and performed appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This section presents the purpose and scope of services conducted for the subject parcel.

### 1.1 Purpose

The Phase I ESA was performed in conformance with ASTM E 1527-21 with the intent of meeting appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The purpose of the Phase I ESA was to provide a professional opinion regarding the presence or absence of recognized environmental conditions (RECs) as defined under *ASTM E 1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The term recognized environmental conditions (REC) is defined in ASTM E 1527-21 as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition”.

## 1.2 Scope of Services

The scope of services conducted consistent with and meeting the intent of ASTM E 1527-21 is summarized below:

- Reviewed provided documentation related to the site.
- Reviewed readily available historical and physical setting sources, which may include aerial photographs, fire insurance maps, local street directories, and/or soil surveys.
- Reviewed readily available environmental regulatory record sources (documents, databases, and reports) to evaluate whether the site has been recorded in County, State or Federal regulatory agency files with regard to contamination on the site or in the immediate vicinity of the site or whether known hazardous waste generators or petroleum product associated businesses are located in the vicinity of the site.
- Contacted the Alachua County Environmental Protection Department (ACEPD).
- Conducted an interview with the owner, owner representative and/or operator of the site (if readily available). In addition, conducted an interview with your designated representative as the “user” of the Phase I ESA.
- Evaluated adjacent site land uses to assess potential for migration of contaminants onto the subject site. This included preliminary evaluation as it relates to vapor migration of contaminants.
- Conducted a visual reconnaissance of the site to observe indications of potential contamination including, for example: visible evidence of spills, stressed vegetation, drums, above ground or buried fuel storage tanks, odors, depressions indicating potential buried waste, unidentified containers, wells, septic systems, stained soil or pavement, and electrical equipment likely to contain PCB’s.
- Performed a driving tour of the area surrounding the site (approximately ¼-mile radius).
- Prepared this report outlining the findings and conclusions related to the site and surrounding area.

Our services were provided under the direction of a Professional Engineer registered in the State of Florida.

## 2.0 SITE DESCRIPTION

### 2.1 Location

The subject site is generally situated south of the SW 21<sup>st</sup> Avenue and SW 14<sup>th</sup> Street intersection in Gainesville, Alachua County, Florida. The site consists of three (3) adjoining parcels. Two (2) of the parcels are contiguous and located along the west side of SW 14<sup>th</sup> Street. The other property is located across the street on the southeast corner of the SW 14<sup>th</sup> Street and SW 21<sup>st</sup> Avenue intersection. These combined parcels will be considered as the subject site for the purposes of this Phase I ESA. The subject site is located within a mostly commercial and residential area.

The Project Site Location Map (Figure 1) illustrates the location of the site. Site boundaries were assumed based on Alachua County Property Appraiser (ACPA) information, a provided site plan, and physical features including roadways, fences, survey stakes and other readily apparent features. The approximate site boundaries and extent are illustrated on Figure 2.

### 2.2 Current Use and Ownership of the Property

According to the ACPA, the subject site consists of Parcel Nos. 15552-002-000, 15552-005-000 & 15552-006-000. The following table provides a summary of the individual parcels, including the listed physical addresses, property owner, acreage, and land use.

ACPA Parcel No.	Site Address	Acreage	Property Owner	Land Use
15552-002-000	2120 SW 14 <sup>th</sup> Street	0.45	St. Francis House Inc	0300 – MFR>10 Units
15552-005-000	2105 SW 14 <sup>th</sup> Street 1321 SW 21 <sup>st</sup> Avenue	0.32	St. Francis House Inc	0300 – MFR>10 Units
15552-006-000	2110 SW 14 <sup>th</sup> Street	0.23	St. Francis House Inc	0800 – MFR<10 Units

ACPA Parcel No. 15552-002-000 is developed with an approximately 5,900-square foot, 2-story apartment building. The structure is listed as having been constructed in 1973. The building includes fifteen (15) units. There is paved parking on the east portion of the site.

ACPA Parcel No. 15552-005-000 is developed with an approximately 8,500-square foot, 2-story apartment building. The structure is listed as having been constructed in 1971. The building includes twenty-one (21) units. There is paved parking on the west portion of the site.

The two (2) apartment buildings are currently occupied by *Sunrise Residence Inn*.

ACPA Parcel No. 15552-006-000 is an undeveloped mostly wooded parcel adjoining Parcel No.15552-002-000 to the north.

### 2.3 Interviews

GSE interviewed property owner representative Kathie DuPree with St. Francis House, Inc on June 10, 2024. Ms. DuPree indicated that St. Francis House, Inc has been associated with the subject site for approximately 25 years. She confirmed the site is developed with an efficiency apartment complex for low-income individuals. It is her understanding that the site has historically been used as efficiency apartments.

**Sunrise Residence Inn**

Gainesville, Alachua County, Florida

GSE Project No. 16612A

The site is served by municipal water and sewer. There are no known potable wells or septic tanks. Ms. DuPree is not aware of any existing or former aboveground storage tanks (ASTs) or underground storage tanks (USTs). She is not aware of surface dumping or buried debris being present on the subject site. Ms. DuPree is not aware of any on-going or previous environmental violations or restrictions associated with the property by federal, state or local regulatory agencies.

Ms. DuPree was asked about the 3 to 4-inch diameter in-ground metal pipe/casing identified adjacent to the new water heater within the boiler room on ACPA Parcel No. 15552-005-000. The casing extends through the floor to ceiling and resembled a UST vent. She confirmed the apartment building recently got a new tankless water heater in April 2024, but had no knowledge of the purpose for the identified metal pipe/casing.

Ms. DuPree was also asked about the 2 to 3-inch diameter in-ground capped metal pipe/casing identified outside the boiler room along the south side of the building on ACPA Parcel No. 15552-005-000. The pipe had a damaged PVC cap. Ms. DuPree had no knowledge of the purpose for the identified metal pipe/casing.

An interview was also conducted with Michael Richmond with Brame Heck Architects as the “user” of this Phase I ESA on June 6, 2024. Other than multi-family residential use, Mr. Richmond does not have any specific knowledge related to the current or historical use of the site. He is not aware of any known or suspected environmental conditions, environmental activity and use limitations (AULs), or environmental liens associated with the property.

### 3.0 SITE RECONNAISSANCE

#### 3.1 On-Site Reconnaissance

Karen Roylos with GSE conducted the site visit on June 6, 2024. The reconnaissance consisted of systematically traversing the site to provide an overlapping visual coverage of the site. The property boundaries were estimated in the field based on the provided site plan, County property appraiser information, and physical features in the field including roadways, fences, survey stakes and other readily apparent features.

Photographs were taken to document the condition of the site. Site Plans with Representative Photographs are provided as Figures 2A-1 through 2A-5, & 2B-1 through 2B-4. The following Table summarizes our site observations.

<b>Summary of Observations</b>				
	Yes	No	Location On Site	Description
Drums, containers, and other storage units	X		Interior and exterior	Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers; multiple propane tanks; two (2) 32-ounce containers of fuel+oil mixture; one (1) 1-quart of lighter fluid; one (1) empty 2-gallon gasoline container; multiple refuse containers; multiple coolers; two (2) wet-vacs; a plastic storage container; an empty 5-gallon bucket
Aboveground / underground storage tanks		X		
Hazardous materials, petroleum products, hazardous waste, biohazardous waste	X		Interior and exterior	Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers; multiple fire extinguishers; multiple propane tanks; one (1) aerosol tire repair; two (2) 32-ounce containers of fuel+oil mixture; one (1) 1-quart of lighter fluid; one (1) empty 2-gallon gasoline container
Pits, ponds, and/or lagoons		X		
Dumps, landfills, and/or borrow pits		X		
Transformers		X		
Surface stains	X		Exterior parking lot area (Parcel No. 15552-002-000)	Incidental surface staining
Wells		X		
Heating and/or cooling equipment	X		Structures	Multiple window-mounted electrical HVAC units; one (1) pad-mounted electrical HVAC unit
Drains and/or sumps	X		Structure (Parcel No. 15552-005-000)	Two (2) floor drains

Solid waste	X		Interior and exterior	One (1) 4-yard refuse container; multiple refuse containers (empty and with household solid waste); two (2) bags of household solid waste; food and beverage containers; multiple coolers; multiple bicycles and bicycle tires; multiple irrigation hoses; tarp; multiple chairs and tables; multiple barbeques; multiple plant containers; multiple mops, brooms and mop buckets; plastic bags; tool boxes; hoses; wires; replacement doors and sinks; window screens; multiple paint rollers; light bulbs; two (2) shopping carts; two (2) wet-vacs; miscellaneous metal parts and tools; one (1) tire; a plastic storage container; a plastic cat house; an empty 5-gallon bucket; a fire pit with household debris; a, multiple wood pallets; wood debris; plastic pans (associated with the window AC units); a cat scratching post; a file cabinet; multiple computer towers; plastic crates; asphalt shingles; PVC pipes; metal debris; concrete, asphalt and brick debris; furniture; linens; appliances; food; other miscellaneous household and construction and demolition (C&D) related items.
Water supply and/or wastewater	X		Structures	Municipal water and sanitary sewer
Stressed vegetation		X		
Hydraulic equipment		X		
Unusual strong odors		X		
Sewage disposal and/or septic tanks	X		Structures	Municipal sanitary sewer
Unnatural mounds and/or depressions		X		

ACPA Parcel No. 15552-005-000 is developed with an approximately 8,500-square foot, 2-story apartment building. Surrounding the building are scattered trees and open maintained landscaped areas. In addition, the parcel has paved parking on the west portion of the site.

ACPA Parcel No. 15552-002-000 is developed with an approximately 5,900-square foot, 2-story apartment building. Surrounding the building are scattered trees and open maintained landscaped areas. The parcel has paved parking on the east portion of the site. The west portion of the site is wooded with trees, palmettos, shrubs, vines and weedy groundcover.

ACPA Parcel No. 15552-006-000 is an undeveloped mostly wooded parcel vegetated with trees, palmettos, shrubs, vines and weedy groundcover. No other structures or improvements were observed on the site.

Representative and common interior and exterior areas of the buildings were visited and observed. The interior residential areas not visited are not interpreted to represent a significant data gap as defined by ASTM E 1527-21. Considering the balance of interior spaces observed, these remaining residential use areas are not expected to represent potential Recognized Environmental Conditions (RECs). The following summarizes our observations for the individual parcels.

**ACPA Parcel No. 15552-005-000**

The building on Parcel No. 15552-005-000 includes twenty-one (21) 1-bedroom, 1-bathroom apartments with kitchenettes, one (1) laundry room, one (1) maintenance room, one (1) storage room, and one (1) boiler room. Air conditioning and heat to the building is provided by widow-mounted electrical HVAC systems. Additionally, one (1) pad-mounted electrical HVAC system was identified along the southern end of the east side of the structure. Three (3) water spigots were also observed along the western and southern exterior walls of the structure.

A natural gas meter is located at the northeast corner of the structure. Additional gas utilities (regulator) are located at the southeast corner. Other utility meters are located along the southern wall of the structure. Wall-mounted piping was observed along the eastern and southern exterior walls of the structure. These pipes appear to be associated with utilities. Additionally, a capped PVC pipe is located at the southeast corner of the building. The exact nature of the capped PVC is unclear, but appears to also be associated with utilities. In addition, multiple vents associated with the bathrooms and kitchenettes were observed along the eastern exterior wall of the structure. The noted piping and vents are not expected to represent a potential environmental concern.

An in-ground capped metal casing on the order of 2 to 3-inches in diameter was identified outside the boiler room along the south side of the structure. The pipe had a damaged PVC cap on it. An additional metal casing with a PVC cap is located along the northern wall near the northeast corner of the structure. Although the exact nature of these pipes was not firmly established, they resemble wastewater clean-out locations. Considering site observations, these are expected to be wastewater related piping. The noted piping appears to be utility services related and is not expected to represent a potential environmental concern.

Two (2) in-ground PVC pipes resembling wastewater clean-out locations were observed on the west perimeter of the structure. The noted piping appears to be utility services related and is not expected to represent a potential environmental concern.

The storage room is being used for storage of miscellaneous parts and tools, including chemical and petroleum containers. Items included two (2) 5-gallon buckets of paint, three (3) paint cans, one (1) 25-ounce bottle of glass cleaner, one (1) 2-gallon bucket of textured wall finish, one (1) 1-quart container of fiberglass resin sealant, one (1) gallon waterproofing sealant, one (1) aerosol container of insecticide, two (2) fire extinguishers, two (2) tubes of caulking, one (1) can of spray-paint, and miscellaneous items including hoses, wires, brooms, doors, window screens, paint rollers, light bulbs, and other miscellaneous metal parts and tools.

The laundry room includes three (3) washers and three (3) dryers. One (1) floor drain was observed near the center of the room. No uncharacteristic staining was noted within or around the drain. In addition, one (1) refuse container containing household debris (including spent dryer sheets, clothing, plastic bags), one (1) empty 43-ounce bleach container, and one (1) empty 10-ounce laundry detergent container were observed within the laundry room.

Inside the back of the laundry room is the maintenance room. Within the maintenance room were miscellaneous parts and tools, and numerous chemical and petroleum containers. Items included multiple cans of spray-paint, multiple aerosol containers of insecticide, multiple tubes of caulking, one (1) 40-ounce herbicide container, multiple cans of PVC glue, multiple 5-gallon and less containers of paint, multiple paint rollers and trays, one (1) 15-pound box of textured wall finish, paint rollers, one (1) aerosol container of WD-40, tool boxes, one (1) fire extinguisher, plastic bags, light bulbs, and other miscellaneous metal parts and tools. An AC air handler was also observed in the maintenance room.

In addition, a utility sink was noted within the maintenance room. The sink is expected to be connected to sanitary sewer. Indications of previous cleaning of paint products is apparent in the sink. Tools and cleaning brushes were also noted within the sink. This incidental cleaning of paint that may have occurred is considered a *de minimus* condition as defined by ASTM 1527, and does not represent a likely environmental concern.

The boiler room includes an electric water heater. One (1) floor drain was observed near the center of the room. The drain appeared to be clogged with debris. No uncharacteristic staining was noted within or around the drain. In addition, a metal casing on the order of 3 to 4-inches in diameter extending through the floor to the ceiling was identified along the northern interior wall of the boiler room, adjacent to the water heater. The casing appears to have an access cap and an approximately 2-inch diameter capped metal pipe extension near the bottom. The casing appears to be plumbing associated with the water heating system.

The boiler room is also being used for storage of miscellaneous maintenance items, including chemical and petroleum containers. Items included numerous 2.5-gallon containers of floor sealer, one (1) 20-pound container of cement, one (1) 40-ounce herbicide container, two (2) tool boxes, one (1) refuse container with a minor amount of household debris, one (1) fire extinguisher, one (1) wet-vac, one (1) 5-gallon bucket of paint, multiple sinks, and other miscellaneous construction and demolition (C&D) related items.

Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers were identified in the various storage areas. Overall housekeeping practices in the storage areas can be described as fair. The observed storage is typical of and associated with motel/apartment maintenance related activities. No compelling evidence of intentional or accidental spillage of stored chemical and petroleum related products were noted in the above described areas that would represent a likely environmental concern warranting further characterization. Although incidental spillage could conceivably have occurred over the years, the observed conditions are characterized as *de minimis* conditions as defined by the ASTM.

One (1) occupied and three (3) vacant apartments were visited and observed on Parcel No. 15552-005-000. Two (2) vacant apartments were relatively empty, with the exception of a bed and dresser in each, one (1) wet-vac, one (1) 1-gallon of bleach, and one (1) spray disinfectant observed. The remaining vacant apartment was under renovation and contained mostly C&D related items, including chemical and petroleum containers. Items included one (1) 1-gallon of muriatic acid, one (1) 2-quart container of ammonia, three (3) spray containers of bleach, one (1) 1-gallon liquid cleaner, two (2) 2.5-gallon container of floor sealer, one (1) 1-gallon container of floor stripper, multiple 1-gallon paint cans, multiple paint rollers and trays, one (1) tube of caulking, one (1) mop and mop bucket, one (1) broom, one (1) mattress and boxspring, one (1) 4-gallon container of floor adhesive, one (1) 16-ounce insulating spray foam, one (1) 40-ounce herbicide container, one (1) 32-ounce spray herbicide, one (1) handheld pump sprayer with unknown contents, one (1) container of bleach wipes, one (1) 2-gallon bucket of textured wall finish, two (2) 4.5-gallon buckets of joint compound, one (1) propane gas torch, two (2) fans, multiple boxes of flooring, one (1) refuse container, kitchen appliances, tools, and other miscellaneous C&D related debris. No evidence of spills or leakage was observed with respect to these containers.

Within the occupied apartment were limited chemical products. Stored within the bathroom cabinet were one (1) box of toilet bowl cleaner tablets, one (1) 30-ounce spray cleaner, one (1) 24-ounce toilet bowl cleaner, one (1) 32-ounce glass cleaner, and one (1) aerosol container of air freshener. Under the kitchen sink were multiple 10-ounce laundry detergent containers, 7-ounce containers of dish soap, and other household sized cleaners. This is consistent with household use. No evidence of spills or leakage was observed with respect to these containers. Household items including furniture, linens, appliances, food, and refuse containers were also inside the occupied unit.

Isolated, scattered surface debris was also observed across Parcel No. 15552-005-000. Materials consisted of household and C&D related debris, including one (1) partially full 5-gallon bucket of paint, multiple bicycles and bicycle tires, one (1) irrigation hose, multiple refuse containers (empty and with household solid waste), tarp, multiple chairs and tables, two (2) barbecues, multiple plant containers, one (1) propane tank, a shopping cart with household and wood debris, beverage containers, asphalt debris, wood debris, plastic pans (associated with the window AC units), a mop, and other miscellaneous household debris. In addition, four (4) fire extinguishers were noted along the west exterior wall of the structure. The observed debris is expected to be associated with apartment tenants and/or maintenance of the building. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

#### **ACPA Parcel Nos. 15552-002-000 & 15552-006-000**

The building on Parcel No. 15552-002-000 includes fourteen (14) 1-bedroom, 1-bathroom apartments and one (1) boiler room. Air conditioning and heat to the building is provided by widow-mounted electrical HVAC systems. Two (2) water spigots were observed along the eastern exterior wall of the structure. A natural gas meter is located near the center of the west wall of the structure. Other utility meters are located along the northern wall of the structure.

Wall-mounted piping was observed along the western and northern exterior walls of the structure. These pipes appear to be associated with utilities. In addition, multiple vents associated with the bathrooms and kitchenettes were observed along the western exterior wall of the structure. The noted piping and vents are not expected to represent a potential environmental concern.

An in-ground PVC pipe resembling a wastewater clean-out location was observed near the northeast corner of Parcel No. 15552-006-000, just outside of the property boundary. The noted piping appears to be utility services related and is not expected to represent a potential environmental concern.

The boiler room includes a natural gas fueled water heater. In addition, one (1) 1-gallon container of floor stripper, one (1) fire extinguisher, one (1) mop bucket, a file cabinet, multiple computer towers, and other miscellaneous C&D debris was observed inside the boiler room. The observed debris is attributed to maintenance of the structure. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

One (1) occupied apartment was visited and observed on Parcel No. 15552-002-000. Within the occupied apartment were limited chemical products, including one (1) 1-gallon carpet shampoo, three (3) containers of insecticide spray, one (1) aerosol tire repair, two (2) 32-ounce containers of fuel+oil mixture, one (1) 1-quart of lighter fluid, and dish soap. This is consistent with household use. Household items including furniture, linens, appliances, food, and refuse containers were also inside the occupied unit.

Scattered surface debris and litter was also observed across Parcel Nos. 15552-002-000 & 15552-006-000. The debris was more concentrated at the northeast corner of the structure, and within the wooded areas. Materials consisted of household and C&D related debris, including one (1) empty 2-gallon gasoline container, one (1) empty 1-gallon container of bleach, multiple coolers, multiple bicycles and bicycle tires, three (3) irrigation hoses, multiple refuse containers (empty and with household solid waste), two (2) bags of household solid waste, one (1) tire, multiple mops and brooms, a mop bucket, multiple chairs and tables, a plastic storage container, a plastic cat house, multiple plant containers, multiple barbecues, tarp, an empty 5-gallon bucket, one (1) propane tank, a fire pit with household debris, food and beverage containers, plastic bags, a shopping cart, multiple wood pallets, wood debris, plastic pans (associated with the window AC units), a cat scratching post, plastic crates, asphalt shingles, PVC pipes, metal debris, concrete and brick debris, and other miscellaneous household and C&D debris. In addition, two (2) fire extinguishers were noted along the east exterior wall of the structure. Spent charcoal briquettes were observed on the ground near the north portion of the building. A majority of observed debris is expected to be associated with apartment tenants and/or maintenance of the building. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

Considering the isolated nature and overall site observations, the observed debris may be characterized as a *de minimis* condition as defined by the ASTM and does not represent a likely environmental condition that would warrant further characterization.

Solid waste is collected in one (1) 4-yard refuse container located along the eastern property boundary of Parcel No. 15552-002-000. Miscellaneous household debris was observed within the dumpster. Multiple garbage cans were also noted throughout the subject site. The containers were empty or contained typical household debris. No uncharacteristic conditions or compelling environmental concerns were identified related to the refuse areas.

Incidental staining resembling vehicular fluids was observed in three (3) locations on the asphalt parking area on Parcel No. 15552-002-000. This condition is characterized as incidental and within an expected range for parking lots. Considering the isolated, incidental, and limited spillage and overall site observations, the above may be characterized as a *de minimis* condition that does not represent a likely environmental condition that would warrant further characterization.

A capped metal pipe resembling a former metal fence post was observed near the northeast portion of ACPA Parcel No. 15552-006-000. An additional metal pipe resembling a former metal fence post was observed near the center of the north wall of the apartment building on Parcel No. 15552-002-000. The apparent metal fence posts do not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

On the southwest corner of ACPA Parcel No. 15552-002-000 was a survey stake, an in-ground PVC pipe, and an in-ground metal pipe on the order of 1-inch in diameter. The PVC pipe appeared to be a property boundary marker. The metal pipe was a hollow metal rebar-type pole that extended approximately 4-inches above the ground surface, and was adjoining a shorter solid metal rebar-type pole. The exact purpose of the metal pipe/pole was unclear, but is anticipated to be an additional property boundary marker. The apparent property markers are not expected to represent a potential environmental concern.

### **Site Observation Summary**

ACPA Parcel No. 15552-005-000 is developed with an approximately 8,500-square foot, 2-story apartment building. ACPA Parcel No. 15552-002-000 is developed with an approximately 5,900-square foot, 2-story apartment building. The parcel has paved parking on the west portion of the site. ACPA Parcel No. 15552-006-000 is an undeveloped mostly wooded parcel

The building on Parcel No. 15552-005-000 includes twenty-one (21) 1-bedroom, 1-bathroom apartments with kitchenettes, one (1) laundry room, one (1) maintenance room, one (1) storage room, and one (1) boiler room.

The laundry room includes three (3) washers and three (3) dryers. One (1) floor drain was observed near the center of the room. Inside the back of the laundry room is the maintenance room. Within the maintenance room were miscellaneous parts and tools, and numerous chemical and petroleum containers. The storage room is being used for storage of miscellaneous parts and tools, including chemical and petroleum containers. The boiler room is also being used for storage of miscellaneous maintenance items, including chemical and petroleum containers. One (1) floor drain was observed near the center of the room. In addition, the room has an electric water heater for the building.

A utility sink was noted within the maintenance room. The sink is expected to be connected to sanitary sewer. Indications of previous cleaning of paint products is apparent in the sink. Tools and cleaning brushes were also noted within the sink. This incidental cleaning of paint that may have occurred is considered a *de minimus* condition as defined by ASTM 1527, and does not represent a likely environmental concern.

Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers were identified in the various storage areas. The observed storage is typical of and associated with motel/apartment maintenance related activities. No compelling evidence of intentional or accidental spillage of stored chemical and petroleum related products were noted in the above described areas that would represent a likely environmental concern warranting further characterization. Although incidental spillage could conceivably have occurred over the years, the observed conditions are characterized as *de minimis* conditions as defined by the ASTM.

One (1) occupied and three (3) vacant apartments were visited and observed on Parcel No. 15552-005-000. Two (2) vacant apartments were relatively empty. The remaining vacant apartment was under renovation and contained mostly C&D related items, including chemical and petroleum containers. Within the occupied apartment were limited chemical products, consistent with household use. No evidence of spills or leakage was observed with respect to these containers.

The building on Parcel No. 15552-002-000 includes fourteen (14) 1-bedroom, 1-bathroom apartments and one (1) boiler room. Miscellaneous C&D debris attributed to maintenance of the structure was observed inside the boiler room. In addition, the room has a natural gas fueled water heater for the building.

One (1) occupied apartment was visited and observed on Parcel No. 15552-002-000. Within the occupied apartment were limited chemical products, consistent with household use.

Isolated, scattered surface debris and litter was observed across the subject site. In addition, solid waste is collected in one (1) 4-yard refuse container located along the eastern property boundary of Parcel No. 15552-002-000. Multiple garbage cans were also noted on Parcel Nos. 15552-005-000 & 15552-002-000. A majority of observed debris is expected to be associated with apartment tenants and/or maintenance of the building. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

With the exception of the noted surface debris and litter, site observations do not suggest that large scale dumping or landfilling has occurred on-site that would warrant concern. No uncharacteristic conditions or compelling indications of buried materials were encountered during the site visit that would represent a likely environmental concern. The observed debris is considered isolated and interpreted as a *de minimis* condition as defined by the ASTM. Municipalities often have nuisance condition ordinances that require the property owner to remove surface debris. Removal and proper off-site disposal of the surface debris should be considered.

No wells or septic tanks were apparent on-site. The property appears to be connected to municipal water and sanitary sewer. With the exception of observed incidental surface staining, no uncharacteristic odors or other compelling indications to suggest a release of chemicals or petroleum products that would represent a likely environmental concern to the subject site were identified. No indications of petroleum product fueled emergency generators, heaters, or boilers were identified. No direct evidence of existing or former ASTs or USTs was observed.

In summary, our on-site reconnaissance did not reveal obvious compelling environmental concerns related to various items identified and discussed above that in our opinion would warrant further characterization beyond this assessment.

## **3.2 Off-Site Reconnaissance**

Karen Roylos performed a visual reconnaissance of the adjacent and nearby properties on June 6, 2024. The intent of our off-site reconnaissance was to identify nearby potential environmental contamination sources and confirm the location of select regulatory listed facilities.

The subject site is located within a mostly commercial and residential area. Nearby land use is described in more detail below. Identified environmentally regulated facilities in the vicinity of the site and their implications are addressed in Section 4.0 of this report.

### **3.2.1 North of the Subject Site**

Adjoining ACPA Parcel No. 15552-006-000 to the north is a single-family residence. The north side of ACPA Parcel No. 15552-005-000 is bordered by SW 21<sup>st</sup> Avenue. Across the SW 21<sup>st</sup> Avenue corridor is Value Lodge motel, a single-family residence, and an undeveloped wooded property toward the northwest. Regulatory information and potential implications of the motel facility are discussed in *Section 4*.

Further north is commercial, institutional, and multi-family residential development.

### **3.2.2 East of the Subject Site**

Adjoining ACPA Parcel No. 15552-005-000 to the east is a commercial retail shopping center. Current tenants include Domino's Pizza, DeMode Nails, and Victory Chapel. The east side of ACPA Parcel Nos. 15552-002-000 & 15552-006-000 are bordered by SW 14<sup>th</sup> Street. Across the SW 14<sup>th</sup> Street corridor is a Dollar General commercial retail facility and the subject site (Parcel No. 15552-005-000). Across SW 14<sup>th</sup> Street toward the southeast is China Star restaurant. Regulatory information and potential implications of the adjoining facilities are discussed in *Section 4*.

Further east is the US Highway 441 (US-441) corridor, and additional commercial and residential development.

### **3.2.3 South of the Subject Site**

Adjoining ACPA Parcel No. 15552-002-000 to the south is a single-family residence. The south side of Parcel No. 15552-005-000 is adjoined by the Dollar General.

Further south is additional residential and commercial development.

### **3.2.4 West of the Subject Site**

Adjoining ACPA Parcel Nos. 15552-002-000 & 15552-006-000 to the west is undeveloped wooded land followed by a stormwater management facility and a creek. The west side of ACPA Parcel No. 15552-005-000 is bordered by SW 14<sup>th</sup> Street followed by the single family residence previously mentioned adjoining the north side of Parcel No. 15552-006-000.

Further west is additional undeveloped wooded land and open pasture associated with UF College Veterinary Medicine. Further northwest is multi-family residential and institutional development. Bivens Arm Lake is located further southwest of the subject site.

## **4.0 REGULATORY AGENCY RECORDS REVIEW**

The following section presents a summary of our regulatory agency records review. The regulatory records search was conducted by our sub-consultant Environmental Data Resources, Inc. (EDR) and is based on information published by County, State, and Federal regulatory agencies. Please note that regulatory listings include only those sites, which are known to the regulatory agencies at the time of publication to be 1) contaminated, 2) in the process of evaluation for potential contamination, or 3) regulated. A copy of the EDR, Inc. summary regulatory information compiled is included in the Appendix. A full copy of the entire report is retained in our files and can be made available upon request.

Pertinent and available listings of environmental concern on or near the subject property were reviewed to meet the intent of the requirements of ASTM 1527 for evidence of activities that may have an adverse environmental impact on the subject site. The subject site was not identified as being listed in the reviewed regulatory databases. The following is a summary of the regulatory information review.

### **4.1 National Priorities List (NPL)**

The NPL is a prioritized list of the Federal EPAs confirmed or proposed facilities and/or locations with confirmed environmental hazards. These sites fall under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) and the Superfund Amendments and Reauthorization Act of 1986 (SARA) and are commonly referred to as “Superfund” sites. The priority of each site is based on factors such as the potential for contamination of public drinking water supplies, the populations at risk, the hazardous potential of substances at the facility, the potential for direct human contact, and the potential for the destruction of sensitive ecosystems. Delisted NPL sites are also searched.

No NPL sites were identified within a 1-mile radius of the subject site.

No delisted NPL sites were identified within a ½-mile radius of the subject site.

### **4.2 Superfund Enterprise Management System (SEMS)**

The SEMS tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to CERCLA. This dataset also contains sites which are either proposed to or on the NPL, and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

No SEMS sites were listed within a ½-mile radius of the subject site.

### **4.3 Emergency Response Notification System (ERNS)**

The ERNS is a national computer database used to store information on releases of oil and hazardous substances. It also identifies those facilities and/or locations that have been reported to the EPA because of the release of potentially hazardous material.

No ERNS sites were reported within a ¼-mile radius of the subject site.

#### 4.4 Federal Resource Conservation and Recovery Act Information System (RCRA) Generator Lists

This list is the EPA's database of registered large, small, and conditionally exempt hazardous waste generators and treatment, storage and disposal (TSD) facilities. Inclusion on these lists does not necessarily indicate contamination but rather the potential due to the presence and handling of hazardous substances. Additional databases searched include the *RCRA NonGen/NLR*, *HAZ WASTE*, and *HW GEN* databases.

The subject site was not listed on the RCRA generator database.

Twenty-one (21) sites were listed on the HAZ WASTE database within a ¼-mile of the subject site.

Two (2) sites were listed on the RCRA generator lists database within a ¼-mile of the subject site. One (1) additional site was listed on the RCRA NonGen/NLR database within a ¼-mile.

***DOLLAR GENERAL # 11538 (2112 13<sup>th</sup> STREET SW)*** adjoins the subject site to the southeast. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is listed as "Very Small Quantity Generator". There were no FDEP inspection records on-line for the listing. Considering the lack of regulatory information, generator status, and our experience with similar sites, this listing is not interpreted to represent a likely environmental concern to the subject site.

***MOTEL ABC (2000 13<sup>th</sup> ST SW)*** is located northeast of the subject site across SW 21<sup>st</sup> Avenue. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as ***CASA LOMA LODGE*** on the Alachua Co. FL database. The facility status is listed as "Out Of Business". The generator status is listed as "Not A Hazardous Waste Generator". There were no FDEP inspection records on-line for the listing. Considering the lack of regulatory information, generator status, and our experience with similar sites, this listing is not interpreted to represent a likely environmental concern to the subject site.

***HOME2 SUITES BY HILTON (2119 13<sup>th</sup> STREET SW)*** is located approximately 300 feet east-southeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as ***HOME2 SUITES BY HILTON (2115 SW 13TH STREET)*** on the Alachua Co. FL database. The address for this facility is also listed as ***BAMBI MOTEL*** on the Alachua Co. FL database.

The facility is listed as "Very Small Generator". The facility status is listed as "Inactive – Does Not Generate Waste". There were no FDEP inspection records on-line for the listing. Considering the lack of regulatory information, generator status, location with regards to the subject site, and our experience with similar sites, this listing is not interpreted to represent a likely environmental concern to the subject site.

**UF HEALTH - SHANDS ENDOSCOPY CENTER (2001 13<sup>th</sup> ST SW)** is located approximately 350 feet northeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as **FLORIDA SURGICAL CENTER** on the Alachua Co. FL database. The facility is listed as “Very Small Generator”. The facility status is listed as “Inactive – Does Not Generate Waste”. There were no FDEP inspection records on-line for the listing. Considering the lack regulatory information, generator status, location with regards to the subject site, and our experience with similar sites, this listing is not interpreted to represent a likely environmental concern to the subject site.

**AMERICAN TUNING & TIRES (2216 13<sup>th</sup> STREET SW)** is located approximately 450 feet south-southeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The address for this facility is also listed as **RONNIE’S SERVICE STATION** (Alachua Co. FL), **BP-SAMS SOUTHSIDE** (UST, UST Finder), **SOUTHSIDE GULF STATION** (EDR Hist Auto), **SAM’S SOUTHSIDE GULF** (EDR Hist Auto, Alachua Co. FL), **SANDRESCHI LLC** (Alachua Co. FL), and **RENT IT INC** (Alachua Co. FL). The facility status is listed as “Out Of Business”. The generator status is listed as “Not A Hazardous Waste Generator”. There were no FDEP inspection records on-line for the listing. Considering the lack regulatory information, generator status, location with regards to the subject site, and our experience with similar sites, this listing is not interpreted to represent a likely environmental concern to the subject site.

**CARRSMITH (2205 SW 13<sup>th</sup> ST)** is located approximately 450 feet east-southeast of the subject site. The facility was identified on the RCRA-VSQG database. The facility is also identified as **CARR SMITH INC** on the HAZ WASTE, UST, UST Finder, EDR Hist Auto, NPDES and Alachua Co. FL databases. The address for this facility is also identified as **EARLYS TEXACO** on the EDR Hist Auto database.

The facility is listed as “Conditionally Exempt Small Quantity Generator”. The facility was listed as a generator dating back to at least 2004. Materials noted as being stored and generated at the site included ignitable waste, benzene, tetrachloroethylene and trichlorethylene. There were no FDEP inspection records on-line for the listing. Considering the lack of regulatory information, generator status, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

The remaining facilities are located in excess of 500+ feet of the subject site. Based on their interpreted business activity, location with respect to the subject site, and regulatory status, these off-site listings are not expected to represent an environmental concern to at the subject site.

#### **4.5 RCRA National Oversight Database Handlers with Corrective Action Activity (CORRACTS) List**

The CORRACTS list identifies facilities that are currently or at one time were subject to EPA enforcement for activities related to their handling of hazardous wastes and summarizes the results of action taken by the EPA.

No sites were listed on the CORRACTS list within a 1-mile radius of the subject site.

#### 4.6 Underground and Aboveground Storage Tanks (USTs and ASTs)

The Florida Department of Environmental Protection requires registration of underground and above ground stationary storage tanks that contain petroleum products or hazardous substances regulated under CERCLA. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Inclusion on this list indicates the presence of stationary storage tanks and therefore the potential for environmental problems. It does not necessarily indicate existing problems. Additional databases searched include the *TANKS* and *UST FINDER* databases.

Eight (8) UST and/or AST facilities were listed within ¼-mile of the subject site.

**DOMINOS PIZZA (2106 SW 13<sup>th</sup> ST)** adjoins the east side of ACPA Parcel No. 15552-005-000. The facility was identified on the UST and UST FINDER databases. The facility is also listed as **DOMINO'S PIZZA (2102 SW 13<sup>th</sup> ST)** on the Alachua Co. FL database. The address for the facility is also listed as **HARDYS ENCO SERVICE** on the EDR Hist Auto database.

Historic tank registration information indicates that three (3) USTs of unknown size were present at the facility prior to at least 1999. Three (3) vent stand pipes were identified on the site during an inspection in 1997, suggesting that the site potentially had abandoned USTs. An FDEP Storage Tank Facility Compliance Inspection Report dated March 1999 indicated the facility was a former gasoline service station. The tanks were anticipated to have contained petroleum. The property owner at that time claimed the tanks were removed in the 1970s, but no documentation was available. The ACEPD directed the excavation of the area in 1999, and confirmed that the tanks were not on the property. The remaining vents were removed at that time as well. No discharges were identified in association with this site. Considering the regulatory information reviewed and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

**TEXACO-KIRKWOOD (2109 SW 13<sup>th</sup> ST)** is located approximately 300 feet east of the subject site. The facility was identified on the UST, UST Finder, UST Finder Release, LUST, DWM CONTAM, Financial Assurance and Cleanup Sites databases. The address for this facility is also identified as **SUWANNEE SWIFTY #226** on the Alachua Co. FL database, and **BUCKLANDS STANDARD SERVICE** and **STANDARD OIL SERVICE STATION** on the EDR Hist Auto database. This facility is further discussed below in *Section 4.7*.

**BP-SAMS SOUTHSIDE (2216 SW 13<sup>th</sup> ST)** is located approximately 450 feet south-southeast of the subject site. The facility was identified on the UST and UST Finder databases. The address for this facility is also identified as **SOUTHSIDE GULF STATION** (EDR Hist Auto), **SAM'S SOUTHSIDE GULF** (EDR Hist Auto, Alachua Co. FL), **RONNIE'S SERVICE STATION** (Alachua Co. FL), **AMERICAN TUNING & TIRES** (HAZ WASTE, Alachua Co. FL), **SANDRESCHI LLC** (Alachua Co. FL), and **RENT IT INC** (Alachua Co. FL).

Tank registration information indicates multiple petroleum USTs on the order of 550 and 3,000-gallons were historically present at the facility between at least 1965 and 1990. FDEP compliance inspections indicate the facility had generally been in compliance over the years, with minor violations noted mostly associated with recordkeeping requirements and proper monitoring well sampling. No discharges were identified in association with this site. ACEPD correspondence dated February 1991 indicated that a closure contamination assessment was conducted, confirming petroleum contamination was not detected at the site. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

**CARRSMITH (2205 SW 13<sup>th</sup> ST)** is located approximately 450 feet east-southeast of the subject site. The facility was identified on the RCRA-VSQG database. The facility is also identified as **CARR SMITH INC** on the HAZ WASTE, UST, UST Finder, EDR Hist Auto, NPDES and Alachua Co. FL databases. The address for this facility is also identified as **EARLYS TEXACO** on the EDR Hist Auto database.

Historic tank registration information indicates that three (3) USTs of unknown size and content were present at the facility prior to at least 1987. No discharges were identified in association with this site. Soil testing during an ACEPD tank removal inspection in 1987 indicated that petroleum contamination was not detected. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

**AGL PROPERTIES OF GAINESVILLE LLC (1750 SW 13<sup>th</sup> ST #400)** is located approximately 800 feet north-northeast of the subject site. The facility was identified on the UST, UST Finder, LUST, UST Finder Release, DWM CONTAM, Financial Assurance, and Cleanup Sites databases. The address for this facility is also identified as **JC'S AUTO SERVICE** (HAZ WASTE, Alachua Co. FL), **AMOCO STATION (SOUTHSIDE)** (Alachua Co. FL), and **PETER AND PAUL'S IMPORT SERVICE** (Alachua Co. FL), and **BROZ AUTO SERVICES** (Alachua Co. FL). This facility is further discussed below in *Section 4.7*.

**SOUTHSIDE SERVICE CENTER (2426 SW 13<sup>th</sup> ST)** is located approximately 800 feet south-southeast of the subject site. The facility was identified on the UST, UST Finder and Alachua Co. FL databases. The facility is also identified as **SOUTH SIDE AUTO CARE** on the Alachua Co. FL database. The address for this facility is also identified as **JC'S AUTO SERVICE** on the HAZ WASTE and Alachua Co. FL databases, and **RYDER TRUCK RENTAL ONE WAY INC** on the Alachua Co. FL.

Historic tank registration information indicates that four (4) 4,000-gallon petroleum USTs were present at the facility prior to at least 1990. In addition, one (1) waste oil UST of unknown size was present at the facility prior to at least 1995. Routine FDEP compliance inspections indicate the facility has been in compliance over the years. No discharges were identified in association with this site. ACEPD correspondence dated July 1990 indicated that a closure contamination assessment was conducted, confirming petroleum contamination was not detected at the site. Additional soil screening during 1995 tank closure activities did not reveal evidence of contamination. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

**LANDMARK PROPERTIES (1111 SW 16<sup>th</sup> AVE)** is located approximately 1,000 feet east-northeast of the subject site. The facility was identified on the AST and Alachua Co. FL databases. The facility is also identified as **PARK 16TH TOWNHOUSE APARTMENTS** on the Alachua Co. FL database. Historic tank registration information and ACEPD correspondence indicates that one (1) 1,000-gallon diesel fuel mobile AST associated with site construction was present at the facility in at least 2015 and 2016. No discharges were identified in association with this site. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

**GAINESVILLE REGIONAL UTIL-RECLAMATION FAC (SW 13TH ST - LIFT STAT #10)** is located approximately 1,100 feet north-northeast of the subject site. The facility was identified on the AST database. Historic tank registration information indicates that one (1) 1,750-gallon diesel fuel AST associated with an emergency generator has been present at the facility dating back to at least 2005. Routine FDEP compliance inspections indicate the facility has been in compliance over the years. No discharges were identified in association with this site. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this listing does not represent a likely environmental concern to the subject site.

#### **4.7 Leaking Underground / Aboveground Storage Tank (LUST / LAST)**

The LUST and LAST databases include facilities and/or locations that have reported the possible release of petroleum products. Included within this list are sites that are in the Florida Early Detection Incentive (EDI) Program, the Abandoned Tank Restoration Program (ATRP), and the Petroleum Liability Insurance Restoration Program (PLIRP). Eligibility in these programs provides opportunity for State funded assessment and remedial action for those sites with environmental problems due to leaking fuel storage tanks. Some sites listed in this database are not eligible for these programs. Additional databases searched include the *UST FINDER RELEASE* database.

The subject site was not listed on the LUST or LAST list.

Five (5) sites were listed on the LUST and/or LAST database within a ½-mile radius of the subject site.

**TEXACO-KIRKWOOD (2109 SW 13<sup>th</sup> ST)** is located approximately 300 feet east of the subject site. This facility was identified on the UST, UST Finder, UST Finder Release, LUST, DWM CONTAM, Financial Assurance, and Cleanup Sites databases. The address for this facility is also identified as **SUWANNEE SWIFTY #226** on the Alachua Co. FL database, and **BUCKLANDS STANDARD SERVICE** and **STANDARD OIL SERVICE STATION** on the EDR Hist Auto database. The facility is listed as “open”, and the cleanup status is listed as “ongoing”.

Tank registration information indicates two (2) 4,000-gallon and two (2) 10,000-gallon petroleum USTs have been present at the facility dating back to at least 1984, with one (1) 4,000-gallon UST closed in place in 2009. A discharge was first reported at the facility in February 1998 due to a liquid leak being detected. ACEPD documentation indicates that during a line, sump, and dispenser closure screening and UST upgrade conducted in July 1999, soil contamination was encountered.

The facility became eligible for the Petroleum Liability Insurance Restoration Program (PLIRP) in July 2000. A site assessment conducted in March 2012 under the Low-Score Site Initiative (LSSI) program indicated soil contamination still remained. Laboratory analytical results for additional soil testing conducted between 2016 and 2017 indicated that the constituents analyzed were below Soil Cleanup Target Levels (SCTLs), and therefore no petroleum impacted soil remained. Groundwater analyses indicated exceedances of respective GCTLs. Groundwater flow was generally documented toward the southwest, west, and north directions.

Additional groundwater assessment conducted in 2018 indicated a contamination plume exceeding groundwater cleanup target levels (GCTLs) existed in the vicinity of the USTs and dispensers. Groundwater flow was documented toward the south, southwest, and west directions. Additional assessment in March 2021 concluded that contaminants still remained above their respective GCTLs. The report recommended additional assessment to further horizontally and vertically delineate the plume, and development of a Remedial Action Plan (RAP). Groundwater flow was documented toward the east.

No additional assessment activities or RAP has been documented for the facility. The most recent document is a purchase order dated May 2, 2024 for additional monitoring well sampling. Considering the regulatory information reviewed, location with regards to the subject site, and recorded groundwater flow direction, this off-site listing is not expected to represent an environmental concern to the subject site.

**AGL PROPERTIES OF GAINESVILLE LLC (1750 SW 13<sup>th</sup> ST #400)** is located approximately 800 feet north-northeast of the subject site. This facility was identified on the UST, UST Finder, LUST, UST Finder Release, DWM CONTAM, Financial Assurance, and Cleanup Sites databases. The address for this facility is also identified as **JC'S AUTO SERVICE** (HAZ WASTE, Alachua Co. FL), **AMOCO STATION (SOUTHSIDE)** (Alachua Co. FL), and **PETER AND PAUL'S IMPORT SERVICE** (Alachua Co. FL), and **BROZ AUTO SERVICES** (Alachua Co. FL). The facility is listed as "closed", and the cleanup status is listed as "ongoing".

Tank registration information indicates multiple petroleum USTs between 3,000 and 8,000 gallons were historically present at the facility between at least 1960 and 2012. Tanks have been removed, replaced, or installed over the years. A discharge was first reported at the facility in November 1988. The discharge was deemed eligible for the EDI program in August 1989.

During multiple UST removals in 1990, approximately 585 tons of contaminated soil was removed. Remedial action consisting of a groundwater recovery and vacuum extraction system was implemented between 1994 and 1995. Additional site assessment conducted in 2014 indicated that petroleum impacted soil and groundwater remained. A RAP consisting of soil vapor extraction wells was implemented between September 2020 and November 2023. The groundwater flow was documented toward the south in December 2023. A Quarterly Operation and Maintenance (O&M) Report dated January 2024 concluded that groundwater contaminants remained below GCTLs for multiple quarters, and the remedial system was shut down. The report recommended four quarters of Post Active Remediation Monitoring (PARM) begin at the facility.

PARM activities began on March 1, 2024. In addition, the remedial system was removed from the site. The Quarterly PARM Report dated April 1, 2024 stated that contaminants were not detected above their respective GCTLs. The groundwater flow was documented toward the southeast. Continued PARM was recommended for the site to meet closure requirements.

Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this site does not represent a likely environmental concern to the subject site.

**CITGO-UNIVERSITY (1260 SW 16<sup>th</sup> AVE)** is located approximately 1,500 feet north-northeast of the subject site. This facility was listed on the UST, UST Finder, LUST, UST Finder Release, DWM CONTAM, Financial Assurance, Cleanup Sites, and Asbestos databases. The facility is listed as “closed”, and the cleanup status is listed as “ongoing”.

Tank registration information indicates multiple petroleum USTs between 550 and 14,000 gallons were historically present at the facility between at least 1970 and 2018. Tanks have been removed, replaced, or installed over the years. A discharge was first reported at the facility in September 1991. The discharge was deemed eligible for the EDI program in August 1989.

Historical remedial activities include source removal (soil excavation) during UST removal in 2009 and 2019. A biosparge remediation system operated from September 2021 to September 2023. The site is currently in PARM. The most recent document is a change order dated April 17, 2024 to extend the PARM activities at the site. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this site does not represent a likely environmental concern to the subject site.

The remaining facilities are located in excess of 1,500+ feet of the subject site. Based on their interpreted business activity, location with respect to the subject site, and regulatory status, these off-site listings are not expected to represent an environmental concern to at the subject site.

#### **4.8 Solid Waste Facilities / Landfill Sites (SWF/LF) List**

The SWF/LF List is concerned with the handling of solid waste and includes locations identified with solid waste land filling or associated activities involving the handling of solid waste. The presence of a site on this list does not necessarily indicate existing environmental contamination but rather a potential to represent a concern. Unregistered or uncontrolled landfills are not included on this list.

No SWF/LF sites were located within a ½-mile radius of the subject site.

#### **4.9 State Hazardous Waste Sites (SHWS) List**

The SHWS records are the states’ equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent or Superfund) are identified along with sites where potentially responsible parties will pay for cleanup. The data comes from the Department of Environmental Protection’s Florida State-Funded Action Sites list.

There were no SHWS sites located within a 1-mile radius of the subject site.

#### **4.10 Florida Sites Lists (FSL)**

The list includes three FDEP databases, the Florida Sites Lists, Superfund Hazardous Waste Sites database, and a listing of the State Funded Action Sites. The list identifies facilities and/or locations that the FDEP has recognized with potential or existing environmental contamination.

One (1) FSL site was identified within a 1-mile radius of the subject site.

**IFAS-HORTICULTURAL UNIT (NW SR 232)** is located approximately 4,600 feet north-northwest of the subject site. The facility was listed on the FL Sites database. The site is identified as an agricultural research station associated with the University of Florida. A 1986 preliminary assessment indicates the facility has been in operation dating back to at least 1955. The facility has historically stored, handled and disposed hazardous wastes including pesticides and laboratory chemicals. Additional assessment conducted in 1987 detected soil and groundwater contamination in multiple areas across the site. A FDEP memorandum from 1998 indicates groundwater impacts were no longer detected, however soil contamination remained in two (2) locations. In 1999, a FDEP memorandum stated that remaining soil contamination would be remediated when sufficient funding became available. No additional assessment has been documented for the facility. Considering the regulatory information reviewed, location with regards to the subject site, and our experience with similar sites, this site does not represent a likely environmental concern to the subject site.

#### **4.11 Brownfields Areas**

The Brownfields Areas list represents areas in which many existing commercial and industrial sites are abandoned or underused due to perceived or known environmental conditions. Financial and regulatory incentives have been established by Municipalities for property owners and businesses located in or considering locating in these areas that have the perception of contamination and/or blight to encourage voluntary cleanup and redevelopment. The presence of a site on this list does not necessarily indicate existing environmental contamination but rather it is located in an area with potential to represent a concern.

No designated Brownfields areas were identified within a ¼-mile radius of the subject site.

#### **4.12 Dry Cleaners List**

The Dry Cleaners List indicates the presence of a site that has a dry cleaner operating or that operated in the past. The list comes from the Florida Department of Environmental Protection.

One (1) Dry Cleaners site was listed within a ½-mile radius of the subject site.

**RON'S CLEANERS (1603 SW 13<sup>th</sup> ST)** is located approximately 1,300 feet north-northeast of the subject site. The facility was identified on the Dry Cleaners, Priority Cleaners, HAZ WASTE, RCRA NonGen/NLR, DWM CONTAM, ERIC Waste Cleanup, Cleanup Sites, ECHO, FINDS and Alachua Co. FL databases. The facility is also identified as **ED'S CLEANERS** on the Alachua Co. FL database. This facility is further discussed below in *Section 4.13*.

#### **4.13 Priority Cleaners**

The Priority Cleaners List represents facilities that are documented as having impacts related to existing or former dry-cleaning sites. The list comes from the Florida Department of Environmental Protection.

One (1) Priority Cleaners site was listed within a ½-mile radius of the subject site.

**RON'S CLEANERS (1603 SW 13<sup>th</sup> ST)** is located approximately 1,300 feet north-northeast of the subject site. The facility was identified on the Dry Cleaners, Priority Cleaners, HAZ WASTE, RCRA NonGen/NLR, DWM CONTAM, ERIC Waste Cleanup, Cleanup Sites, ECHO, FINDS and Alachua Co. FL databases. The facility is also identified as **ED'S CLEANERS** on the Alachua Co. FL database.

A site screening assessment in 1997 indicated that chlorinated drycleaning solvents (including tetrachloroethene) were detected in soil samples. A Drycleaning Solvent Cleanup Program (DSCP) Application form submitted to the FDEP in 1997 indicated the facility was in operation dating back to 1996. The facility became eligible for state-administered cleanup under the DSCP in 1998. A soil and groundwater assessment conducted in 2008 indicated that perchloroethylene was also detected in soil and groundwater. A 2011 source removal report stated that approximately 3,600 tons of impacted soil was removed. The report concluded that contaminated soil remained in some areas below the depth at which the excavation terminated, and that the remainder of the soil and groundwater contamination will be assessed and remediated when State Funding becomes available. No additional assessment has been documented for the facility.

Chlorinated solvent plumes for similar sites have been determined to have localized to area-wide off-site impacts. Should an area-wide impact be identified, it would be considered and incorporated into the assessment and remediation strategy under the DSCP. Although it is conceivable that an impact could be present in the area of the subject site, considering the regulatory information, eligibility under the DSCP, location and distance with regards to the subject site, and our experience with similar sites, this site does not represent a likely environmental concern to the subject site that would warrant further characterization beyond this assessment.

#### **4.14 Orphan List Summary**

The orphan list summary was reviewed. This list represents facilities that cannot be mapped due to inadequate or poor address.

No facilities were identified on the Orphans List.

#### **4.15 Alachua County Facility List**

Facilities that are regulated under the Alachua County Hazardous Material Ordinance (ACHMO) are included on this list. This includes facilities that utilize, store, or dispose of hazardous materials and petroleum products. This list also incorporates sites undergoing development related review.

The subject site was not listed on the Alachua County Facility List (ACFL).

Forty-two (42) facilities were listed within a ¼-mile radius of the subject site.

**DOMINO'S PIZZA (2102 SW 13<sup>th</sup> ST)** adjoins the east side of ACPA Parcel No. 15552-005-000. The facility was identified on the Alachua Co. FL database. The facility is also listed as **DOMINOS PIZZA (2106 SW 13<sup>th</sup> ST)** on the UST and UST FINDER databases. The address for the facility is also listed as **HARDYS ENCO SERVICE** on the EDR Hist Auto database. The facility is designated as Class E (representing exempt facilities with limited hazardous material and/or petroleum product storage). No on-line inspection reports or other regulatory information was available for this listing. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**DOLLAR GENERAL # 11538 (2112 13<sup>th</sup> STREET SW)** adjoins the subject site to the southeast. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is designated as Class AA (representing facilities posing minimal potential for discharge but storing hazardous waste). Routine ACEPD compliance inspection reports dating back to 2015 indicate the facility has properly managed regulated materials. No violations were documented. The most recent ACEPD inspection dated May 22, 2024 indicates the facility is in compliance. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**MOTEL ABC (2000 13<sup>th</sup> ST SW)** is located northeast of the subject site across SW 21<sup>st</sup> Avenue. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as **CASA LOMA LODGE** on the Alachua Co. FL database. The facility is designated as Class E (representing exempt facilities with limited hazardous material and/or petroleum product storage). One (1) initial ACEPD compliance inspection report from 2005 was available. The inspection confirmed the facility was exempt. No violations were documented. Considering the interpreted business activity, regulatory status and designation, this listing is not interpreted to represent a likely environmental concern to the subject site.

**HOME2 SUITES BY HILTON (2119 13<sup>th</sup> STREET SW)** is located approximately 300 feet east-southeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as **HOME2 SUITES BY HILTON (2115 SW 13TH STREET)** on the Alachua Co. FL database. The address for this facility is also listed as **BAMBI MOTEL** on the Alachua Co. FL database.

**BAMBI MOTEL** is designated as Class E (representing exempt facilities with limited hazardous material and/or petroleum product storage). The facility is listed as closed since 2015. With the exception of a 2005 initial and 2015 closure ACEPD facility inspection report, no routine compliance inspection reports or other regulatory information was available for this operation. No violations were noted on the two (2) inspection reports. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**HOME2 SUITES BY HILTON** is designated as Class AA (representing facilities posing minimal potential for discharge but storing hazardous waste). Routine ACEPD compliance inspection reports dating back to 2015 generally indicate the facility has properly managed regulated materials, with minor violations noted mostly associated with warning signs. The facility has one (1) open ACEPD violation from a routine compliance inspection dated August 18, 2023 regarding NFPA fire diamonds needed for maintenance and/or hazardous material storage areas. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**SUWANNEE SWIFTY #226 (2109 SW 13<sup>th</sup> ST, 904-376-3293)** is located approximately 300 feet east of the subject site. The facility was identified on the Alachua Co. FL database. The address for this facility is also listed as **TEXACO-KIRKWOOD** on the UST, UST Finder, UST Finder Release, LUST, DWM CONTAM, Financial Assurance and Cleanup Sites databases, and **BUCKLANDS STANDARD SERVICE** and **STANDARD OIL SERVICE STATION** on the EDR Hist Auto database. The facility is designated as Class E (representing exempt facilities with limited hazardous material and/or petroleum product storage). No on-line inspection reports or other regulatory information was available for this listing. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**UF HEALTH - SHANDS ENDOSCOPY CENTER (2001 13<sup>th</sup> ST SW)** is located approximately 350 feet northeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The facility is also identified as **FLORIDA SURGICAL CENTER** on the Alachua Co. FL database. The facility is designated as Class T – Undefined. Routine ACEPD compliance inspection reports dating back to 2009 generally indicate the facility has properly managed regulated materials, with minor violations noted mostly associated with warning signs. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**AMERICAN TUNING & TIRES (2216 13<sup>th</sup> STREET SW)** is located approximately 450 feet south-southeast of the subject site. The facility was identified on the HAZ WASTE and Alachua Co. FL databases. The address for this facility is also listed as **RONNIE'S SERVICE STATION** (Alachua Co. FL), **BP-SAMS SOUTHSIDE** (UST, UST Finder), **SOUTHSIDE GULF STATION** (EDR Hist Auto), **SAM'S SOUTHSIDE GULF** (EDR Hist Auto, Alachua Co. FL), **SANDRESCHI LLC** (Alachua Co. FL), and **RENT IT INC** (Alachua Co. FL).

The facility has historically been designated as Class E (representing exempt facilities with limited hazardous material and/or petroleum product storage) (**SAM'S SOUTHSIDE GULF**, **SANDRESCHI LLC**), Class A (representing facilities storing or using hazardous materials and utilizing septic tanks for domestic waste disposal and generating less than 55-gallons of hazardous waste per year) (**RENT IT INC**, **RONNIE'S SERVICE STATION**), and Class B (representing facilities storing or using hazardous materials and generating more than fifty-five (55) gallons per year of hazardous wastes and not otherwise included in specific class) (**AMERICAN TUNING & TIRES**).

ACEPD facility inspection reports indicate the order (from least to most recent) of identified tenants of the facility were **SAM'S SOUTHSIDE GULF**, **RENT IT INC**, **RONNIE'S SERVICE STATION**, **AMERICAN TUNING & TIRES**, and **SANDRESCHI LLC**. ACEPD facility inspection records indicate **AMERICAN TUNING & TIRES** was closed in 2017. The reports indicate that the subsequent listed tenant **SANDRESCHI LLC** was an automotive sales facility that included detailing in 2018, but no longer performed detailing in 2019.

Routine ACEPD compliance inspection reports dating back to 1989 generally indicate the facility properly managed regulated materials, with minor violations noted mostly associated with storage container management and labelling, and record keeping requirements. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

**CARR SMITH INC (2205 SW 13<sup>th</sup> STREET)** is located approximately 450 feet east-southeast of the subject site. The facility was identified on the HAZ WASTE, UST, UST Finder, EDR Hist Auto, NPDES and Alachua Co. FL databases. The facility is also identified as **CARRSMITH** on the RCRA-VSQG database. The address for this facility is also identified as **EARLYS TEXACO** on the EDR Hist Auto database. The facility is designated as and Class B (representing facilities storing or using hazardous materials and generating more than fifty-five (55) gallons per year of hazardous wastes and not otherwise included in specific class). The facility is listed as closed since 2021. Routine ACEPD compliance inspection reports dating back to 1993 generally indicate the facility properly managed regulated materials, with minor violations noted mostly associated with storage container management and labelling, secondary containment requirements, and record keeping requirements. Considering the interpreted business activity, regulatory status and designation, this listing is not expected to represent a likely environmental concern to the subject site.

The remaining facilities are located in excess of 500+ feet of the subject site. Based on their interpreted business activity, location with respect to the subject site, and regulatory status, these off-site listings are not expected to represent an environmental concern to at the subject site.

#### 4.16 Other Regulatory Lists

Additional regulatory listings and identified facilities were reviewed and considered as part of this assessment. Identified listings included the DWM CONTAM, NPDES, Cleanup Sites, ERIC Waste Cleanup, ECHO, Financial Assurance, TIER 2, FINDS, Asbestos, EDR Hist Auto and EDR Hist Cleaner databases.

The EDR US Historic Auto Station and EDR Historical Cleaner lists represent proprietary research conducted by EDR through a search of selected national collections of business directories resulting in listings of potential gas station/filling station/service station sites and laundry & dry-cleaning facilities that may not be included on other regulatory lists. The EDR Hist Cleaner database identified one (1) facility within 1/8-mile radius of the subject site. The EDR Hist Auto database identified four (4) facilities within 1/8-mile radius of the subject site.

**DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)** corresponds to a former commercial retail center tenant adjoining the east side of ACPA Parcel No. 15552-005-000. This facility was listed on the EDR Hist Cleaner database. The facility was not identified on the FDEP dry cleaners or priority cleaners lists.

The EDR Historical Cleaner database and city directory listings indicate that the site was previously occupied by a laundries and dry cleaners facility prior to 1976. The database identifies the tenant as **DRY CLEANING LAUNDRY** in 1975. City directory listings identify the address as occupied by **METRO BY T-MOBILE** (2020); **GATOR PAGING & CELLULAR** (2017, 2014, 2010, 2005); **EDDIE C PUB 00 VERFLOW** (1996); **VACANT** (1990, 1978, 1977, 1976); and **DRY CLEANING LAUNDRY** (1975). The dry cleaner listing was identified in 1975, and did not appear in other available city directories (1974, 1976–1990, & 1995). City directory listings indicate the facility was vacant in 1976–1978 and in 1990.

The tenant name suggests dry cleaning was historically conducted at this location. No regulatory listings, discharges, or complaints were identified in association with the site. The retail center was constructed in 1974 according to ACPA information. The drycleaner was listed in 1975 but not in 1974 or 1976-78. This suggests the facility was present for less than 2 years. Historical use of chlorinated solvents could conceivably pose as a potential environmental concern in regards to the subject site. However, considering the short length of time the dry cleaner was in operation, and our experience with similar sites, this listing is not expected to represent a likely environmental concern that would warrant further characterization.

**HARDYS ENCO SERVICE (2106 SW 13<sup>th</sup> ST)** corresponds to a former retail gasoline service station adjoining the east side of ACPA Parcel No. 15552-005-000. This facility was listed on the EDR Hist Auto database. The address for this facility is also identified as **DOMINOS PIZZA** on the UST and UST FINDER databases, and **DOMINO'S PIZZA (2102 SW 13<sup>th</sup> ST)** on the Alachua Co. FL database.

The EDR Historical Auto Stations database and city directory listings indicate that the site was previously occupied by a gasoline station prior to at least 1975. The database identifies the tenant as **HARDYS ENCO SERVICE** in 1971. City directory listings identify the facility as **DOMINO'S PIZZA** (2020, 2017, 2014, 2010); **WEHBE JAMMIN INC** (2014); **EDDIE CS BILLIARDS** (2000); **EDDIE CS PUB** (1996, 1995, 1990); **THE PURPLE PORPOISE** (1985, 1981); **PROTECTA VISION** (1981); **THE IRON HORSE RESTAURANT** (1975); and **HARDYS ENCO SERVICE** (1971). The potential implications of this facility were previously discussed in *Section 4.6*.

**BUCKLANDS STANDARD SERVICE (2109 SW 13<sup>th</sup> ST)** is located approximately 300 feet east of the subject site. This facility was identified on the EDR Hist Auto database. The address for this facility is also identified as **STANDARD OIL SERVICE STATION** on the EDR Hist Auto database, **TEXACO-KIRKWOOD** on the UST, UST Finder, UST Finder Release, LUST, DWM CONTAM, Financial Assurance, and Cleanup Sites databases, and **SUWANNEE SWIFTY #226** on the Alachua Co. FL database.

The EDR Historical Auto Stations database and city directory listings indicate that the site has been occupied by a gasoline station dating back to at least 1971. The database identifies the tenant as **LEWIS OIL CO INC** (2000 through 2014); **LAND OSUN MANAGEMENT CORP** (1997-1999); **SUWANNEE SWIFTY STORES INC** (1992-1996); **GATOR BEVERAGE MART** (1983, 1982, 1980); **BUCKLANDS STANDARD SERVICE** (1975); and **STANDARD OIL SERVICE STATION** (1971). City directory listings identify the facility as **ATM** (2020); **KWIK STOP TEXACO** (2020, 2017, 2014, 2010, 2005); **FAST TRACK FOODS NO 226** (2000); **GRO RET** (1996); **SUWANNEE SWIFTY NO 226 GRO RET** (1995, 1990, 1985); **GATOR BEVERAGES** (1981); **BUCKLANDS STANDARD SERVICE** (1975); **STANDARD OIL SERVICE STATION** (1971); and **HALL FREEMAN B FR** (1962, 1958). The implications of this facility were previously discussed in *Section 4.7*.

**SAM'S SOUTHSIDE GULF (2216 SW 13<sup>th</sup> ST)** is located approximately 450 feet south-southeast of the subject site. The facility was identified on the EDR Hist Auto and Alachua Co. FL databases. The address for this facility is also listed as **SOUTHSIDE GULF STATION** (EDR Hist Auto), **BP-SAMS SOUTHSIDE** (UST, UST Finder), **RONNIE'S SERVICE STATION** (Alachua Co. FL), **AMERICAN TUNING & TIRES** (HAZ WASTE, Alachua Co. FL), **SANDRESCHI LLC** (Alachua Co. FL), and **RENT IT INC** (Alachua Co. FL).

The EDR Historical Auto Stations database and city directory listings indicate that the site was previously occupied by a gasoline station between at least 1969 and 1993. Between 2000 and 2005 the facility is identified as a general automotive repair shop. The database identifies the tenant as **RONNIES NAPA AUTO CARE** (2000 through 2005); **SAMS SOUTHSIDE GULF** (1988-1993, 1985); **DEATON BRAKE SV GAINESVILLE** (1985, 1983, 1982, 1978-1980); and **SOUTHSIDE GULF STATION** (1985, 1969-1975). City directory listings identify the facility as **SANDRESCHI LLC** (2020); **ROMERY PROPERTIES LLC** (2020); **CHARMAGNE NISCHWITZ** (2020); **REYNALDO LEAL** (2020); **AMERICAN TUNING** (2017, 2014, 2010); **PRO CAR DOC** (2010); **RONNIES SERVICE CENTER** (2000); **U HAUL CO** (2000); OCCUPANT UNKNOWN (2000); **RENT IT INC EQUIP RENTAL** (1996, 1995); **VACANT** (1990); **SAMS SOUTHSIDE GULF** (1985, 1981, 1975, 1971); and **DEATONS BRAKE SERVICE** (1981, 1975). The implications of this facility were previously discussed in *Section 4.6*.

**CARR SMITH INC (2205 SW 13<sup>th</sup> ST)** is located approximately 450 feet east-southeast of the subject site. The facility was identified on the HAZ WASTE, UST, UST Finder, EDR Hist Auto, NPDES and Alachua Co. FL databases. The facility is also identified as **CARRSMITH** on the RCRA-VSQG database. The address for this facility is also identified as **EARLYS TEXACO** on the EDR Hist Auto database.

The EDR Historical Auto Stations database and city directory listings indicate that the site was previously occupied by a gasoline station between at least 1962 and 1985. The facility is identified as a general automotive repair shop between 1985 and 1993. The database identifies the tenant as **CARRSMITH INC** (1985 through 1993, 1983, 1982) and **EARLYS TEXACO SERVICE** (1969-1975, 1971, 1962). City directory listings identify the facility as **CARRSMITH INC** (2020, 2014, 2010, 2005, 2000, 1996, 1995, 1990, 1985); **INFINITI REPAIRS** (2000); **U HAUL COMPANY NEIGHBORHOOD DEALERS** (1981); **EARLYS TEXACO SERVICE STATION** (1981, 1975, 1971, 1962); **U HALL TRAILERS** (1962); and **VACANT** (1958). The implications of this facility were previously discussed in *Section 4.6*.

Many of the facilities included in the above lists were identified on previously highlighted lists discussed herein. The implications of facilities included in the above listings were considered as part of this assessment and addressed as considered prudent by other sections herein. Considering the regulatory information and location with respect to the subject site, the additional identified listings do not represent a likely environmental concern to the subject site.

#### **4.17 Supplemental Regulatory Information**

As part of this review, GSE reviewed State and ACEPD on-line regulatory documentation to obtain further information related to the subject site and nearby listed facilities. ACEPD is contracted by the State to assist in management of the storage tank and other regulated facilities in Alachua County. Furthermore, Alachua County has a Hazardous Materials Management Code, which the ACEPD administers and enforces.

Dr. Christopher Gilbert, Ph.D. with the ACEPD was contacted to determine if additional information related to known environmental concerns in the area. Dr. Gilbert informed us that the ACEPD is not aware of additional sites or pertinent information related to the subject site or surrounding area.

The FDEP Cleanup Sites Contamination Locator Map was utilized to search for known Brownfields Sites, Other Waste Cleanup, Petroleum, PFAS, and Superfund sites within a 1-mile radius of the site. No additional sites were identified through this review.

We also reviewed the FDEP Ground Water Contamination Areas GIS layer, a statewide map showing the boundaries of delineated areas of known groundwater contamination pursuant to Chapter 62-524, F.A.C., New Potable Water Well Permitting in Delineated Areas. Thirty-eight (38) Florida counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. This GIS layer represents approximately 427,897 acres in 38 counties in Florida that have been delineated for groundwater contamination. However, it does not represent all known sources of groundwater contamination for the state of Florida. The subject site is not located within a delineated area of known groundwater contamination.

As part of the regulatory review conducted by EDR, the Super Act Program Well Data and the USGS Wells databases were utilized to search for water wells in the vicinity of the subject site. In addition, the Florida Department of Health (FDOH) EH Water Well Surveillance database was reviewed for well testing data for water wells that have been tested for contaminants on the subject site and/or adjoining properties. The subject site and adjoining areas were not identified as having a well on-site.

Information compiled was previously discussed in the individual sections above. Supplemental data reviewed did not identify or suggest that a known or suspected soil or groundwater impact is present that would be expected to impact the subject property.

#### **4.18 Regulatory Information Summary**

The subject site was not identified through the regulatory information review. No historical recognized environmental conditions (HRECs) or controlled recognized environmental condition (CREC) were identified related to the subject site.

Multiple off-site regulated facilities were identified in the area. This included **DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)** corresponding to a former commercial retail center tenant adjoining the east side of ACPA Parcel No. 15552-005-000. This facility was listed on the EDR Hist Cleaner database. The facility was not identified on the FDEP dry cleaners or priority cleaners lists.

The tenant name suggests dry cleaning was formerly conducted at this location. No regulatory listings, discharges, or complaints were identified in association with the site. The retail center was constructed in 1974 according to ACPA information. This appears consistent with the historical aerial photograph review. The drycleaner was listed in 1975 but not in 1974 or 1976-78. This suggests the facility was present for less than 2 years. Historical use of chlorinated solvents by the former drycleaners could conceivably pose as a potential environmental concern in regards to the subject site. However, considering the short length of time the dry cleaner was in operation, and our experience with similar sites, this listing is not expected to represent a likely environmental concern that would warrant further characterization.

Considering the regulatory information reviewed, locations with respect to the subject site, and interpreted business activity, the off-site listed facilities do not represent a likely environmental concern to the subject site that would warrant further characterization.

## 5.0 PHYSICAL SETTING SOURCE

This section provides a summary of physical sources reviewed as part of this assessment.

### 5.1 Topographic Map Review

Review of the Gainesville East (2021) and Micanopy (2021) Quadrangles USGS Topographic Map<sup>1</sup> and Alachua County LiDAR topographic data<sup>2</sup> indicates the ground surface elevation at the site ranges approximately 70 to 85 feet NGVD. The topography at ACPA Parcel Nos. 15552-006-000 & 15552-002-000 is relatively flat on the eastern portion, and steeply slopes down to the west on the western portion. ACPA Parcel No. 15552-005-000 is relatively flat, gently sloping down to the north-northwest. Regional topography is characterized by gently rolling hills, and is generally sloping down to the southwest.

The Floridan aquifer occurs at an estimated elevation on the order of 50 to 60 feet<sup>3</sup>. Based on area topography and published information, the overall regional flow of the Floridan in this area is interpreted as being towards the northwest. The Floridan Aquifer is generally semi-confined to unconfined in this area.

Nearby regulated facilities east and north-northeast of the subject site documented variable groundwater flow directions towards the west, southwest, south, southeast, and north overtime. Various natural and man-made features affect the actual groundwater flow direction. Considering these features, the overall groundwater flow is interpreted as being toward the nearby drainage creek and stormwater management facility west of the site. In order to establish the actual groundwater gradient across the site, in-situ field measurements would be necessary.

### 5.2 SCS Soil Survey Review

The site is mapped as two (2) dominant soil series by the Soil Conservation Service (SCS) Soil Survey for Alachua County<sup>4</sup>. The following soil descriptions are from the Soil Survey.

**Urban land** – In areas mapped as Urban land, 85 percent or more of the surface is covered with shopping centers, parking lots, buildings, streets, sidewalks, and related facilities. The natural soil cannot be observed. The few small open areas, mostly parks and vacant lots, are soils of the Arredondo, Blichton, Millhopper, Sparr, and Wauchula series. Many of these open areas have been altered by cutting and shaping or by having fill material spread on the surface. Slopes range from 0 to 2 percent.

Included with this Urban land in mapping are small areas that are only about 55 to 85 percent covered with urban facilities. Total included areas are about 15 percent.

**Bivans sand, 5 to 8 percent slopes** – This is a sloping, poorly drained soil on short breaking slopes and along hillsides of the uplands. The areas are irregular and elongated in shape. They range from about 5 to 40 acres.

<sup>2</sup> Alachua County Department of Growth Management. [mapgenius.alachuacounty.us/](http://mapgenius.alachuacounty.us/).

<sup>3</sup> USGS. Potentiometric Surface of the Upper Floridan Aquifer (September 2021).

<sup>4</sup> Soil Survey of Alachua County, Florida. Soil Conservation Service, U.S. Department of Agriculture.

**Sunrise Residence Inn**

Gainesville, Alachua County, Florida

GSE Project No. 16612A

Typically, the surface layer is dark gray sand about 5 inches thick. The subsurface layer is light brownish gray sand about 5 inches thick. It has a few nodules of ironstone and fragments of phosphatic limestone. The subsoil extends to a depth of 59 inches. The upper 20 inches is gray sandy clay and a few nodules of ironstone and fragments of phosphatic limestone. The next 29 inches is gray, mottled sandy clay. Between depths of 59 and 80 inches, the underlying material is gray, mottled sandy clay.

Included with this soil in mapping are small areas of Blichton, Boardman, Lochloosa, and Wachoota soils. Small areas of soils that are similar to Bivans soils but that have a very dark gray or black loamy sand surface layer 8 to 12 inches thick over a sandy clay loam subsoil are also included in some areas. Small areas of Bivans soil that have slopes of 2 to 5 percent are included. Total included areas are about 15 percent or less.

In this Bivans soil, the subsurface layer and upper part of the subsoil are saturated by a perched water table for 1 to 3 months during most years. Wetness is caused mainly by hillside seepage. Surface runoff is rapid. The available water capacity is low to medium. Permeability is moderate to moderately rapid in the surface and subsurface layers. It is very slow to slow in the subsoil. Natural fertility is low to medium, and the organic matter content is moderately low to moderate in the surface layer.

**Pits or Dumps or Arrents** - The subject site or adjoining properties were not mapped with the “Pits or Dumps” or “Arrents” designation. These correspond to the location of a former excavation area (likely to mine fill, limestone or phosphate) or landfills.

## 6.0 HISTORICAL USE INFORMATION

To ascertain historical use of the site, a review of select historical information for the site and immediate area was performed. We reviewed aerial photographs of the area provided by EDR dated 2019, 2015, 2010, 2007, 1999, 1991, 1982, 1979, 1974, 1964, 1961, 1956, 1949 and 1937. Aerial photographs from the ACPA dated 2023, 2020, 2017, 2010, 2008, 2006, 2004, 2001, 1996, 1979, 1974, 1968, 1961, 1957, 1949 and 1938 were also reviewed. Google Earth Images (2024, 2023, 2021, 2019, 2018, 2017, 2016, 2015, 2012, 2011, 2010, 2008, 2007, 2006, 2005, 1999 and 1995) and available Google Street View images (2023, 2022, 2019, 2018, 2017, 2016, 2015, 2014, 2011, 2008 and 2007) were reviewed. In addition, FDOT aeriels (2022, 2014, 1994, 1982, 1971 and 1964) provided additional historical context. Historical USGS topographic maps (2021, 2018, 2015, 2012, 1994, 1988, 1981, 1966, 1894, 1892 and 1890) and USDA (1961, 1956, 1949 and 1937) were also reviewed.

The Alachua County Soil Survey for the area was reviewed. The ACPA information was used to determine the nature of select nearby development. We also conducted an interview with a property owner representative and “user” of this Phase I ESA (see *Section 2.3*).

No historical Sanborn fire insurance map coverage was available for the area. A city directories review for the site and adjoining properties was conducted by EDR. The city directory review identified listings in the immediate area dating back to 1951. The subject site was identified as being listed in 2020, 2017, 2014, 2010, 2005, 2000 and 1995. Supplemental city directory listings (1995, 1990, 1987, 1985, 1984, 1983, 1982, 1981, 1980, 1979, 1978, 1977, 1976, 1975, 1974, 1973, 1972, 1971, 1970, 1969, 1968, 1963, 1962, 1961, 1960, 1957, 1955) were obtained from the Alachua County Public Library.

Federal, State, and County environmental regulatory agency lists, as identified in Section 4.0 of this report, were reviewed for environmental associations with the subject site and near vicinity properties. The information compiled during our review of the regulatory lists is discussed in the Regulatory Information section of this report.

Please refer to the Site Location Plan, the Site and Vicinity Aerial Plan (2024) and the EDR Aerial Photo Decade Package, city directories, and other historical information included in the Appendix along with the following discussion.

### 6.1 Site Historical Information Review

Review of the aerial photographs, topographic maps, city directories, and Alachua County Property Appraiser (ACPA) information indicate the site has been in multi-family residential use dating back to at least 1971. City directory listings confirm residential use dating back to at least 1995. City directory listings for the site include *SUNRISE RESIDENCE INN* (2020, 2017, 2014, 2010, 2005) and multiple individual residents dating back to at least 1995. ACPA information indicates the two (2) apartment buildings and associated improvements were constructed in 1971 (Parcel No. 15552-005-000) and 1973 (Parcel No. 15552-002-000), respectively. The buildings are evident in aerial photographs and topographic maps dating back to at least 1971 and 1974, respectively.

Prior to current site improvements, aerial photographs and topographic maps indicate ACPA Parcel No. 15552-005-000 was mostly open pasture with a residential structure dating back to at least 1961. Prior to this, the parcel was mostly open pasture with few scattered trees along the western boundary dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Prior to current site improvements, aerial photographs indicate ACPA Parcel No. 15552-002-000 was a wooded parcel with a residential structure dating back to at least 1956. Prior to this, the parcel was undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

ACPA Parcel No. 15552-006-000 has remained undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Sometime between 1937 and 1949, improvements to the creek located west of the subject site are evident, routing it closer to the western border of the subject site with a north to south alignment. The 1949 aerial image indicates the creek historically adjoined the western border of ACPA Parcel Nos. 15552-002-000 & 15552-006-000. A subsequent aerial photograph dated 1956 shows the creek in its current alignment with additional improvements. It is anticipated that the steep slope observed during our reconnaissance along the west side of the subject site is a result of these improvements (earth moving activities). No borrow pits were identified on the subject site or surrounding areas. No indications of operational areas associated with the adjoining land improvements are evident on the subject site.

With the exception of the creek improvements along the western border of the site between the 1930s and 1950s, overall, no large-scale excavation, clearing, dumping, or filling of the site was indicated on the aerial and topographic information review. Soil survey, topographic, and aerial photograph information do not suggest that borrow pit activities were present on or in the immediate adjoining area of the subject property. There were no indications of large-scale agricultural operations (including buildings, storage, staging, processing areas) being associated with the subject property. Historical site use is not considered a likely environmental concern to the subject site that would warrant further characterization.

## **6.2 Near Vicinity Current and Historical Information**

The subject site is located within a mostly commercial and residential area. Initial development in the area dates back to at least the 1890s. Additional development has occurred over the years.

Commercial development is evident in historical aerial photographs and topographic maps dating back to at least the 1940s. Residential development is evident dating back to at least the 1890s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1890s. City directory listings confirm development in the immediate area dating back to at least 1955.

The US Highway 441 (US-441) corridor to the east is evident in historical aerial photographs and topographic maps dating back to at least the 1930s. Improvements (widening) to the road are evident in the 1950s. The SW 16<sup>th</sup> Avenue corridor to the north is evident dating back to at least the 1970s. Bivens Arm Lake is located southwest of the subject site.

Considering the development, interpreted groundwater flow, review of regulatory information, and interpreted historical use, there is no compelling evidence to suggest there is an environmental concern to the subject site related to the identified off-site activities that would warrant further characterization.

The following describes the history of the immediate vicinity in more detail.

### **6.2.1 North of the Subject Site**

Adjoining ACPA Parcel No. 15552-006-000 to the north is a single-family residence. ACPA information indicates the residential structure was built in 2002. City directory listings confirm residential use dating back to at least 2005. Prior to development, the property remained undeveloped wooded land dating back to at least 1937. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s.

An aerial photograph dated 1949 appears to show an unimproved access road or trail traversing along the subject site property boundary in an east to west orientation. Near the center of the road/trail appears to have been an area of ground disturbance. The disturbance and access road/trail coincide with stormwater improvements west of the subject site. The disturbance is not evident in 1937, and is no longer apparent in 1956. The area of disturbance was visited during the reconnaissance. No indications of buried debris or other environmental concerns were identified in the vicinity. The access road/trail is expected to have provided access across the site and surrounding areas. The disturbance is expected to have been associated with that road/trail. It is conceivable the feature is a soil mound associated with the adjacent stormwater improvements. The disturbance and access road/trail is not expected to be an environmental concern to the subject site.

The north side of ACPA Parcel No. 15552-005-000 is bordered by SW 21<sup>st</sup> Avenue. The SW 21<sup>st</sup> Avenue corridor is evident dating back to at least the 1940s. Across the SW 21<sup>st</sup> Avenue corridor is Value Lodge motel, a single-family residence, and an undeveloped wooded property toward the northwest. ACPA information indicates the motel was built in 1962. It is evident in aerial photographs and topographic maps dating back to at least 1964. City directory listings indicate the property had a motel dating back to at least 1955. Listings include *VALUE LODGE* (2020); *ABC MOTEL* (2017, 2014, 2010, 2005); *NOVELLUS COMPUTER LINE* (2005); *RAMANAND INVESTORS INC* (2005); *SUPER 8 OF GAINESVILLE* (2005); *SUPER 8 MOTEL* (2000); and *CASA LOMA LODGE MOTEL* (1996, 1995, 1990, 1985, 1981, 1980, 1955). Regulatory information and potential implications of this facility were discussed in *Section 4*.

The residential structure is listed as built in 1940. It is evident in aerial photographs dating back to at least 1949. City directory listings confirm residential use dating back to at least 1955. Prior to development, the properties across the SW 21<sup>st</sup> Avenue corridor remained open pasture dating back to at least the 1930s. Topographic maps indicate the properties remained undeveloped dating back to at least the 1890s.

The undeveloped wooded property toward the northwest has remained undeveloped wooded to partially wooded land dating back to at least the 1940s. Prior to this, the property remained open pasture dating back to at least the 1930s. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s.

Further north is commercial, institutional, and multi-family residential development. Commercial and institutional development is evident in historical aerial photographs and topographic maps dating back to at least the 1950s. Initial multi-family residential development is evident dating back to at least the 1950s. Single-family residential development is evident dating back to at least the 1890s. Prior to current development, the area remained mostly open pasture with scattered rural residences dating back to at least the 1890s.

### **6.2.2 East of the Subject Site**

Adjoining ACPA Parcel No. 15552-005-000 to the east is a commercial retail shopping center. Current tenants include Domino's Pizza, DeMode Nails, and Victory Chapel. ACPA information indicates the shopping center was built in 1974. Prior to this, aerial photographs, regulatory records and city directory listings indicate a gasoline service station was on the property dating back to at least 1963. Prior to this, the property remained open pasture dating back to at least 1937. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s.

City directory listings for the facility confirm commercial use dating back to at least 1963. Listings include *DOMINOS PIZZA* (2020, 2017, 2014, 2010, 2005, 2000, 1996, 1995, 1990, 1985, 1981); *METRO BY T-MOBILE* (2020); *DE MODE NAILS* (2020); *MARY KELLY* (2020); *GATOR PAGING & CELLULAR* (2017, 2014, 2010, 2005); *TOTAL VIDEO SERVICE INC* (2017, 2014, 2010); *WEHBE JAMMIN INC* (2014); *EDDIE CS BILLIARDS* (2000); *EDDIE CS PUB* (1996, 1995, 1990); *EDDIE C PUB 00 VERFLOW* (1996); *THE PURPLE PORPOISE* (1985, 1981); *PROJECTA VISION* (1981); *DRY CLEANING LAUNDRY* (1975); *THE IRON HORSE RESTAURANT* (1975); *LIL GENERAL CONVENIENCE STORE* (1975); *HARDYS ENCO SERVICE* (1971, 1970); *JIMS ENCO* (1970); *TREASTER'S ENCO SERVICE* (1969, 1968); and *HENDERSON'S ESSO SERV* (1963). Regulatory information and potential implications of these facility listings were discussed in *Section 4*.

*DRY CLEANING LAUNDRY* was confirmed as a tenant of the shopping center in supplemental city directory listings from 1975. The facility was listed as a *Laundries and Dry Cleaners* facility. The listing was identified in 1975, and did not appear in other available city directories (1974, 1976–1990, & 1995). City directory listings indicate the facility was vacant in 1976–1978 and in 1990. This suggests the cleaners was present for less than 2 years. The address for this facility corresponds to the following available listings – *METRO BY T-MOBILE* (2020); *GATOR PAGING & CELLULAR* (2017, 2014, 2010, 2005); *EDDIE C PUB 00 VERFLOW* (1996); *VACANT* (1990, 1978, 1977, 1976); and *DRY CLEANING LAUNDRY* (1975).

The east side of ACPA Parcel Nos. 15552-002-000 & 15552-006-000 are bordered by SW 14<sup>th</sup> Street. The SW 14<sup>th</sup> Street corridor is evident dating back to at least the 1940s. Across the SW 14<sup>th</sup> Street corridor is a Dollar General commercial retail facility and the subject site (Parcel No. 15552-005-000). ACPA information indicates the commercial retail facility was built in 2009. Prior to this, aerial photographs, street view images, regulatory records and city directory listings indicate the property was a motel dating back to at least the 1940s. Considering multiple individual residents identified in city directory listings for the site, it is anticipated the building was used as a multi-family apartment dating back to at least the 1990s. Prior to this, the property was open pasture dating back to at least 1937. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s.

City directory listings confirm commercial and residential use of the site dating back to at least 1957. City directory listings include *DOLLAR GENERAL* (2020, 2017); *WESTERN UNION AGENT LOCATION* (2020); *REDBOX* (2020, 2017); *CASA LOMA LODGE MOTEL* (1975, 1971, 1970, 1969, 1968, 1963, 1962, 1960, 1958); *TURNER HAL* (1971, 1970); *HOWE ROBERT N* (1970); *OPPEMANN ROBT B* (1970, 1969, 1968, 1963); *MODESITT TREAVY E MGR* (1962); *HARSHBARGER WM V* (1963, 1962); *GOLD HSE RESTR FR* (1960, 1958, 1957); *KEENEY JOHN D FR* (1960, 1958); *BUD'S SERV STORE GRO* (1957); and multiple individual residents dating back to at least 1995. Regulatory information and potential implications of these facility listings were discussed in *Section 4*.

Across SW 14<sup>th</sup> Street toward the southeast is a China Star restaurant. ACPA information indicates the commercial retail facility was built in 1970. City directory listings confirm commercial use of the site dating back to at least 1971. Listings include *CHINA STAR* (2020, 2017); *FISHER MARANTZ STONE IN* (2020); *ASIAN STAR* (2014); *WAFFLE HOUSE* (2005, 2000, 1996, 1995, 1990, 1985, 1981); *STIRRAT MARY WAFFLE HOUSE THE* (1971); and *TURNER HAL H WAFFLE HOUSE THE* (1971). Prior to this, the property was open undeveloped land partially used by the adjoining facility to the south (apparent parking area) dating back to at least 1956. Prior to this, the property was open pasture dating back to at least 1937. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s.

Further east is the US-441 corridor, and additional commercial and residential development. Commercial development is evident in historical aerial photographs and topographic maps dating back to at least the 1950s. Multi-family residential development is evident dating back to at least the 1970s. Single-family residential development is evident dating back to at least the 1890s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1890s.

### **6.2.3 South of the Subject Site**

Adjoining ACPA Parcel No. 15552-002-000 to the south is a single-family residence. ACPA information indicates the residential structure was built in 2003. City directory listings confirm residential use dating back to at least 2005. Prior to development, the property remained undeveloped wooded land dating back to at least 1974. Prior to this, a residential structure is evident on the property dating back to at least 1956. Prior to this, the property was undeveloped wooded land and open pasture dating back to at least 1937. Topographic maps indicate the property remained undeveloped dating back to at least the 1890s. The south side of Parcel No. 15552-005-000 is adjoined by the Dollar General discussed above.

Further south is additional residential and commercial development. Commercial development is evident in historical aerial photographs and topographic maps dating back to at least the 1940s. Multi-family residential development is evident dating back to at least the 1960s. Single-family residential development is evident dating back to at least the 1930s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1930s. Topographic maps indicate the area to the south was undeveloped in at least the 1890s.

#### **6.2.4 West of the Subject Site**

Adjoining ACPA Parcel Nos. 15552-002-000 & 15552-006-000 to the west is undeveloped wooded land followed by a stormwater management facility and a creek. Initial construction of the stormwater management facility is evident in 2016. The creek is evident dating back to at least 1890. It traverses the area in a southwest to northeast alignment. As previously mentioned, improvements to the creek are evident sometime between 1937 and 1949, routing it closer to the western border of the subject site with a north to south alignment. The 1949 aerial image indicates the creek formerly adjoined the western border of ACPA Parcel Nos. 15552-002-000 & 15552-006-000. A subsequent aerial photograph dated 1956 shows the creek back in its original alignment with additional improvements (widening, lengthening). The creek has remained in its current configuration dating back to at least 1956.

Further west is additional undeveloped wooded land and open pasture associated with UF College Veterinary Medicine. The open pasture areas associated with UF have remained open pasture dating back to at least the 1930s. Further northwest is multi-family residential and institutional development. Bivens Arm Lake is located further southwest of the subject site. Multi-family residential development dates back to at least the 1960s. Institutional development dates back to at least the 1990s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1890s.

## 7.0 VAPOR ENCROACHMENT SCREENING

A Vapor Encroachment Screening (VES) evaluation was performed to characterize the site and evaluate if the nearby sites of concern are likely to result in vapor encroachment onto the subject site.

To further characterize the potential for the current and historical activities to have impacted the site, GSE conducted a Tier 1 Screening, as defined under ASTM E 2600-10. This assessment was performed in general conformance with the scope and limitations of ASTM E 2600-10. The following sections summarize the associated findings.

The Tier 1 Screening is performed in order to identify if a Vapor Encroachment Condition (VEC) exists at the subject site. The approximate minimum search distance for chemicals of concern (COC) includes contaminated sites within  $\frac{1}{3}$ -mile radius of the subject site. The approximate minimum search distance for Petroleum Hydrocarbon COC (PHCO) includes contaminated sites within  $\frac{1}{10}$ -mile radius of the subject site.

The VES takes into consideration the interpreted groundwater flow direction, soil composition of the general area, topographic information, and the distance of the contaminated site to the subject site. The physical setting information is included in Section 5.0 of this report. The EDR Vapor Encroachment Screen (Appendix B) summarizes the information compiled as it relates to possible vapor encroachment onto the site.

The EDR VES identified multiple facilities within the minimum search distance, including a former dry cleaner and gasoline service station adjoining the subject site to the east. These facilities were evaluated as part of regulatory information review (*Section 4*).

The adjoining historical dry cleaner (***DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)***) and historical auto station (***HARDYS ENCO SERVICE (2106 SW 13<sup>th</sup> ST); DOMINOS PIZZA (2106 SW 13<sup>th</sup> ST)***) listings do not have soil or groundwater impacts associated with the former activities at the facility. Therefore, these facilities do not represent a likely environmental concern related to migrating vapors at the subject site. The former drycleaners that adjoined the site to the east was present for less than 2 years according to the historical information compiled. Accordingly, this facility is not interpreted to represent a likely environmental concern related to potential for vapor intrusion onto the subject site.

Considering the identified facilities, area physical setting, combined with the historical and regulatory information review, the area may be characterized as having a low potential for vapor encroachment at the subject site.

## 8.0 CONCLUSIONS

GSE Engineering & Consulting, Inc. (GSE) has completed a Phase I Environmental Site Assessment (Phase I ESA) for the Sunrise Residence Inn property located in Gainesville, Alachua County, Florida. The subject property consists of three (3) adjacent parcels situated south of the SW 21<sup>st</sup> Avenue and SW 14<sup>th</sup> Street intersection. Exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

### Site Reconnaissance Summary

Alachua County Property Appraiser (ACPA) Parcel No. 15552-005-000 is developed with an approximately 8,500-square foot, 2-story apartment building. ACPA Parcel No. 15552-002-000 is developed with an approximately 5,900-square foot, 2-story apartment building. The parcel has paved parking on the west portion of the site. ACPA Parcel No. 15552-006-000 is an undeveloped mostly wooded parcel

The building on Parcel No. 15552-005-000 includes twenty-one (21) 1-bedroom, 1-bathroom apartments with kitchenettes, one (1) laundry room, one (1) maintenance room, one (1) storage room, and one (1) boiler room.

The laundry room includes three (3) washers and three (3) dryers. One (1) floor drain was observed near the center of the room. Inside the back of the laundry room is the maintenance room. Within the maintenance room were miscellaneous parts and tools, and numerous chemical and petroleum containers. The storage room is being used for storage of miscellaneous parts and tools, including chemical and petroleum containers. The boiler room is also being used for storage of miscellaneous maintenance items, including chemical and petroleum containers. One (1) floor drain was observed near the center of the room. In addition, the room has an electric water heater for the building.

A utility sink was noted within the maintenance room. The sink is expected to be connected to sanitary sewer. Indications of previous cleaning of paint products is apparent in the sink. Tools and cleaning brushes were also noted within the sink. This incidental cleaning of paint that may have occurred is considered a *de minimus* condition as defined by ASTM 1527, and does not represent a likely environmental concern.

Numerous full to partially full household sized paint, cleaning, maintenance, and pesticide containers were identified in the various storage areas. The observed storage is typical of and associated with motel/apartment maintenance related activities. No compelling evidence of intentional or accidental spillage of stored chemical and petroleum related products were noted in the above described areas that would represent a likely environmental concern warranting further characterization. Although incidental spillage could conceivably have occurred over the years, the observed conditions are characterized as *de minimis* conditions as defined by the ASTM.

One (1) occupied and three (3) vacant apartments were visited and observed on Parcel No. 15552-005-000. Two (2) vacant apartments were relatively empty. The remaining vacant apartment was under renovation and contained mostly C&D related items, including chemical and petroleum containers. Within the occupied apartment were limited chemical products, consistent with household use. No evidence of spills or leakage was observed with respect to these containers.

The building on Parcel No. 15552-002-000 includes fourteen (14) 1-bedroom, 1-bathroom apartments and one (1) boiler room. Miscellaneous C&D debris attributed to maintenance of the structure was observed inside the boiler room. In addition, the room has a natural gas fueled water heater for the building.

One (1) occupied apartment was visited and observed on Parcel No. 15552-002-000. Within the occupied apartment were limited chemical products, consistent with household use.

Isolated, scattered surface debris and litter was observed across the subject site. In addition, solid waste is collected in one (1) 4-yard refuse container located along the eastern property boundary of Parcel No. 15552-002-000. Multiple garbage cans were also noted on Parcel Nos. 15552-005-000 & 15552-002-000. A majority of observed debris is expected to be associated with apartment tenants and/or maintenance of the building. The debris does not represent a likely environmental concern to the subject site that would warrant further characterization beyond that of this assessment.

With the exception of the noted surface debris and litter, site observations do not suggest that large scale dumping or landfilling has occurred on-site that would warrant concern. No uncharacteristic conditions or compelling indications of buried materials were encountered during the site visit that would represent a likely environmental concern. The observed debris is considered isolated and interpreted as a *de minimis* condition as defined by the ASTM. Municipalities often have nuisance condition ordinances that require the property owner to remove surface debris. Removal and proper off-site disposal of the surface debris should be considered.

No wells or septic tanks were apparent on-site. The property appears to be connected to municipal water and sanitary sewer. With the exception of observed incidental surface staining, no uncharacteristic odors or other compelling indications to suggest a release of chemicals or petroleum products that would represent a likely environmental concern to the subject site were identified. No indications of petroleum product fueled emergency generators, heaters, or boilers were identified. No direct evidence of existing or former ASTs or USTs was observed.

### **Site Historical Use and Regulatory Information**

Review of the aerial photographs, topographic maps, city directories, and Alachua County Property Appraiser (ACPA) information indicate the site has been in multi-family residential use dating back to at least 1971. City directory listings confirm residential use dating back to at least 1995. City directory listings for the site include *SUNRISE RESIDENCE INN* (2020, 2017, 2014, 2010, 2005) and multiple individual residents dating back to at least 1995. ACPA information indicates the two (2) apartment buildings and associated improvements were constructed in 1971 (Parcel No. 15552-005-000) and 1973 (Parcel No. 15552-002-000), respectively. The buildings are evident in aerial photographs and topographic maps dating back to at least 1971 and 1974, respectively.

Prior to current site improvements, aerial photographs and topographic maps indicate ACPA Parcel No. 15552-005-000 was mostly open pasture with a residential structure dating back to at least 1961. Prior to this, the parcel was mostly open pasture with few scattered trees along the western boundary dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Prior to current site improvements, aerial photographs indicate ACPA Parcel No. 15552-002-000 was a wooded parcel with a residential structure dating back to at least 1956. Prior to this, the parcel was undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

ACPA Parcel No. 15552-006-000 has remained undeveloped wooded to partially wooded land dating back to at least 1937. Topographic maps confirm the parcel remained undeveloped dating back to at least the 1890s.

Sometime between 1937 and 1949, improvements to the creek located west of the subject site are evident, routing it closer to the western border of the subject site with a north to south alignment. The 1949 aerial image indicates the creek historically adjoined the western border of ACPA Parcel Nos. 15552-002-000 & 15552-006-000. A subsequent aerial photograph dated 1956 shows the creek in its current alignment with additional improvements. It is anticipated that the steep slope observed during our reconnaissance along the west side of the subject site is a result of these improvements (earth moving activities). No borrow pits were identified on the subject site or surrounding areas. No indications of operational areas associated with the adjoining land improvements are evident on the subject site.

With the exception of the creek improvements along the western border of the site between the 1930s and 1950s, overall, no large-scale excavation, clearing, dumping, or filling of the site was indicated on the aerial and topographic information review. Soil survey, topographic, and aerial photograph information do not suggest that borrow pit activities were present on or in the immediate adjoining area of the subject property. There were no indications of large-scale agricultural operations (including buildings, storage, staging, processing areas) being associated with the subject property. Historical site use is not considered a likely environmental concern to the subject site that would warrant further characterization.

The subject site was not identified through the regulatory information review. No historical recognized environmental conditions (HRECs) or controlled recognized environmental condition (CREC) were identified related to the subject site.

### **Off-Site Reconnaissance and Regulatory Information**

The subject site is located within a mostly commercial and residential area. Initial development in the area dates back to at least the 1890s. Additional development has occurred over the years.

Commercial development is evident in historical aerial photographs and topographic maps dating back to at least the 1940s. Residential development is evident dating back to at least the 1890s. Prior to current development, the area remained mostly open pasture and undeveloped wooded land with scattered rural residences dating back to at least the 1890s. City directory listings confirm development in the immediate area dating back to at least 1955.

The US Highway 441 (US-441) corridor to the east is evident in historical aerial photographs and topographic maps dating back to at least the 1930s. Improvements (widening) to the road are evident in the 1950s. The SW 16<sup>th</sup> Avenue corridor to the north is evident dating back to at least the 1970s. Bivens Arm Lake is located southwest of the subject site.

Multiple off-site regulated facilities were identified in the area. This included **DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)** corresponding to a former commercial retail center tenant adjoining the east side of ACPA Parcel No. 15552-005-000. This facility was listed on the EDR Hist Cleaner database. The facility was not identified on the FDEP dry cleaners or priority cleaners lists.

The tenant name suggests dry cleaning was formerly conducted at this location. No regulatory listings, discharges, or complaints were identified in association with the site. The retail center was constructed in 1974 according to ACPA information. This appears consistent with the historical aerial photograph review. The drycleaner was listed in 1975 but not in 1974 or 1976-78. This suggests the facility was present for less than 2 years. Historical use of chlorinated solvents by the former drycleaners could conceivably pose as a potential environmental concern in regards to the subject site. However, considering the short length of time the dry cleaner was in operation, and our experience with similar sites, this listing is not expected to represent a likely environmental concern that would warrant further characterization.

Considering the regulatory information reviewed, locations with respect to the subject site, and interpreted business activity, the off-site listed facilities do not represent a likely environmental concern to the subject site that would warrant further characterization.

### **Vapor Encroachment Screening**

A Vapor Encroachment Screening (VES) evaluation was performed to characterize the site and evaluate if the nearby sites of concern are likely to result in vapor encroachment onto the subject site. The EDR VES identified multiple facilities within the minimum search distance, including a former dry cleaner and gasoline service station adjoining the subject site to the east. These facilities were evaluated as part of regulatory information review.

The adjoining historical dry cleaner (**DRY CLEANING LAUNDRY (2108 SW 13<sup>th</sup> ST)**) and historical auto station (**HARDYS ENCO SERVICE (2106 SW 13<sup>th</sup> ST); DOMINOS PIZZA (2106 SW 13<sup>th</sup> ST)**) listings do not have soil or groundwater impacts associated with the former activities at the facility. Therefore, these facilities do not represent a likely environmental concern related to migrating vapors at the subject site. The former drycleaners that adjoined the site to the east was present for less than 2 years according to the historical information compiled. Accordingly, this facility is not interpreted to represent a likely environmental concern related to potential for vapor intrusion onto the subject site.

Considering the identified facilities, area physical setting, combined with the historical and regulatory information review, the area may be characterized as having a low potential for vapor encroachment at the subject site.

### **Conclusion**

GSE has completed this Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-21 of the subject property. This assessment has revealed no evidence of recognized environmental conditions in connection with the property that would warrant further evaluation.

## 9.0 LIMITATIONS OF ENVIRONMENTAL ASSESSMENT

The conclusions and recommendations contained in this report represent our professional opinions. These opinions are presented in accordance with currently accepted practices at this time and location and are subject to the inherent limitations of environmental assessments. Qualifications of the Environmental Professional are included in Appendix C.

GSE obtained, reviewed, and evaluated information currently readily available from the client and local, State, and Federal public entities. GSE's conclusion, opinions, and recommendations are based, in part, on this information. GSE's services did not include the verification of the accuracy or authenticity of this information. GSE performed a limited site reconnaissance within the project time and budget allotted. GSE focused on subject property areas deemed more likely to exhibit hazardous materials or conditions. Other areas may have received limited attention or may have been inaccessible at the time of our reconnaissance. GSE's report is based upon information provided to GSE and observations made during the site reconnaissance.

Given the inherent limitations of environmental assessment work, GSE does not guarantee that the site is free of hazardous or potentially hazardous materials or conditions or that latent or undiscovered conditions will not become evident in the future. Supplemental assessment services could be conducted in order to obtain a greater degree of certainty with respect to actual site conditions, and confirm the opinions and conclusions presented herein.

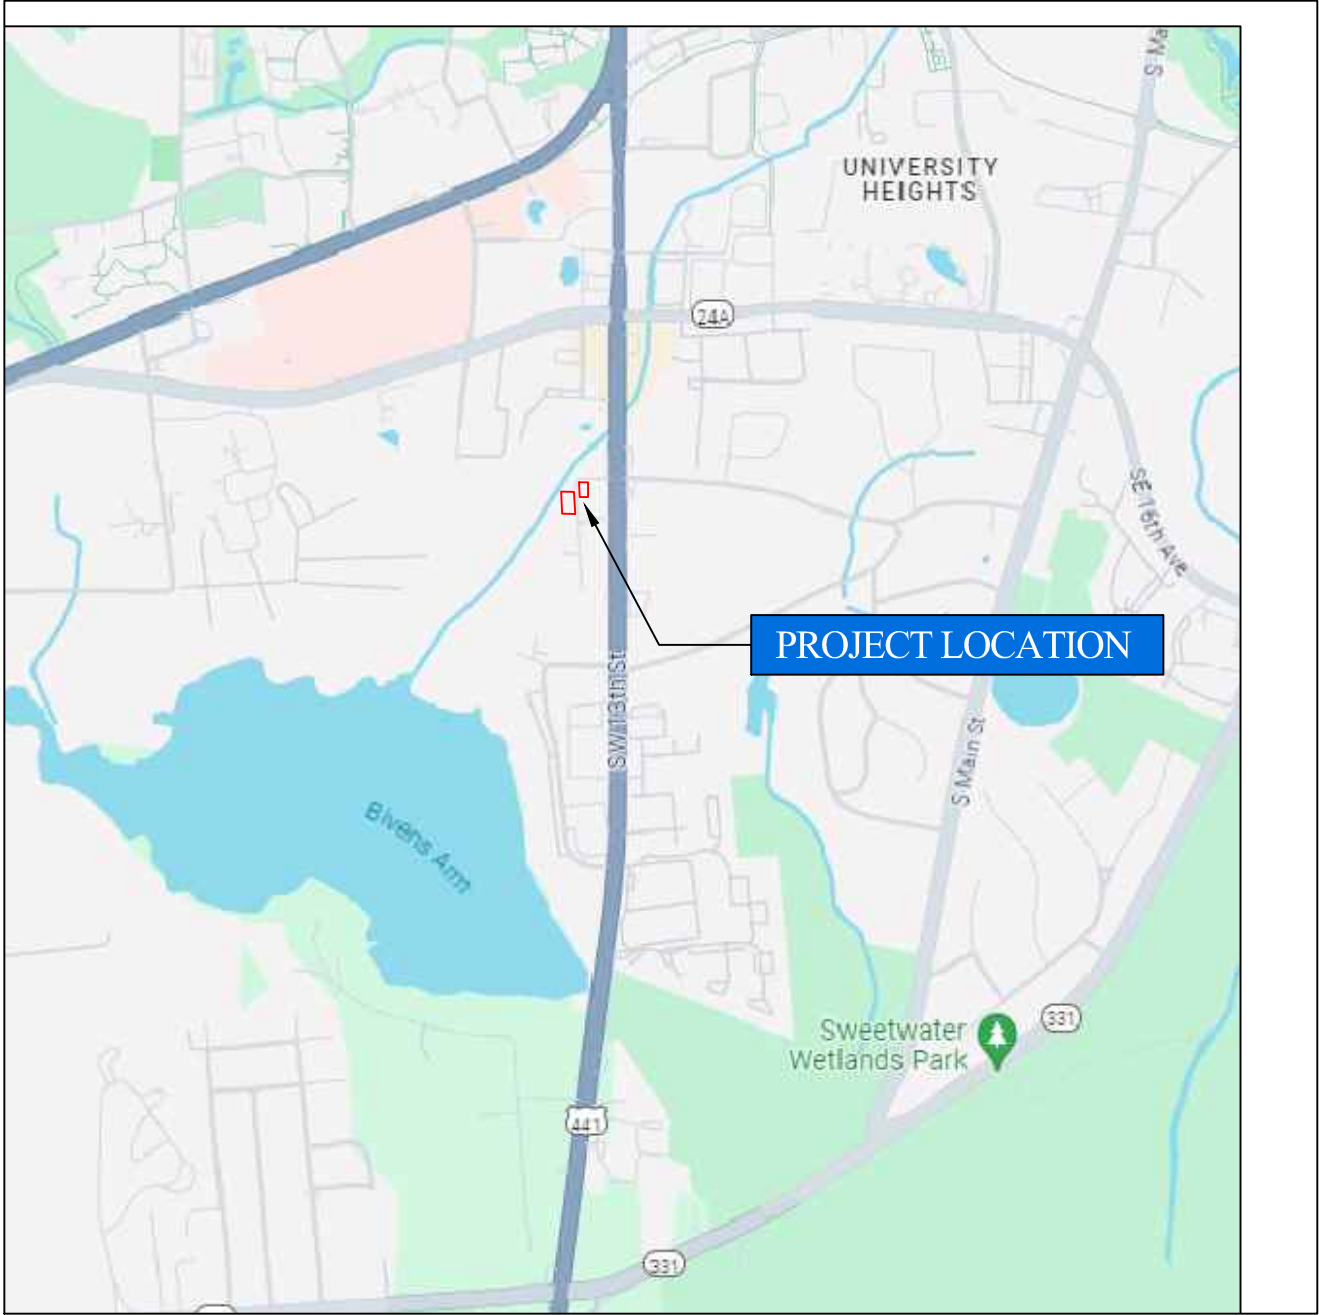

This Phase I ESA "meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction)". Furthermore, the "date of the report generally does not represent the date the individual components of all appropriate inquiries were completed and should not be used when evaluating compliance with the 180-day or 1-year all appropriate inquiries requirements".

In some cases, a business environmental risk (BER) is identified as part of the Phase I ESA. This is defined by the ASTM as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice".

GSE requested the "user" provide title related documents associated with known and identified AULs and Environmental Liens in Land Title Records or Judicial Records. Reviewing and interpreting these records is a "user responsibility" as outlined in the ASTM. GSE relied on the user to interpret and directly inform and provide GSE with information related to AULs and/or Environmental Liens. If title related documentation was furnished, GSE conducted a cursory review of the information in an effort to identify obvious and compelling AULs or Environmental Liens. GSE review of these records should not be interpreted as a comprehensive or exhaustive review of these documents, as this remains the responsibility of the user.

In order to fully understand the legal implications that may be associated with the findings presented herein, it may be prudent and appropriate for the information to be reviewed and evaluated by legal counsel.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

## EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). GSE ENGINEERING & CONSULTING, INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by GSE ENGINEERING & CONSULTING, INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

SW 14TH ST/SW 21ST AVE  
GAINESVILLE, FL 32608

#### COORDINATES

Latitude (North): 29.6322830 - 29° 37' 56.21"  
Longitude (West): 82.3406370 - 82° 20' 26.29"  
Universal Transverse Mercator: Zone 17  
UTM X (Meters): 370215.9  
UTM Y (Meters): 3278612.8  
Elevation: 81 ft. above sea level

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal RCRA generators***

An online review and analysis by GSE ENGINEERING & CONSULTING, INC. of the RCRA-VSQQ list, as provided by EDR, has revealed that there are 2 RCRA-VSQQ sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CARRSMITH EPA ID:: FLR000115535:	2205 SW 13TH ST	ESE 0 - 1/8 (0.088 mi.)	D35	15

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GSE Engineering & Consulting, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

**Certified Sanborn Results:**

**PO #** 16612A  
**Project** Sunrise Residence Inn

**UNMAPPED PROPERTY**

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 4F9D-41F6-A0E4

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

**Limited Permission To Make Copies**

GSE Engineering & Consulting, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1925 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

# EDR Historical Topo Map Report

05/24/24

**Site Name:**

16612A Sunrise Residence Inn  
SW 14th St/SW 21st Ave  
Gainesville, FL 32608  
EDR Inquiry # 7662512.4

**Client Name:**

GSE Engineering & Consulting, Inc.  
5590 SW 64th Street  
Gainesville, FL 32608  
Contact: Karen Roylos

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GSE Engineering & Consulting, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

**Search Results:****Coordinates:**

## **APPENDIX C**

## Joakim (Jay) B. Nordqvist, P.E.

Principal Engineer/ QA/QC Officer

Engineering & Consulting, Inc.

5590 SW 64<sup>th</sup> Street, Suite B

Gainesville, FL 32608

Gseengineering.com

### Professional Profile

Mr. Nordqvist has a very broad-based knowledge of the environmental and construction industry having been involved in environmental, geotechnical and construction related work for over 35+ years. His primary professional focus has been in the environmental consulting area of practice. Mr. Nordqvist has been Principal-In-Charge for hundreds of contamination assessments for both private and governmental clients. These have ranged from preliminary to full delineation assessments and remediation including petroleum products, chlorinated solvents, metals, pesticides, and other contaminants. Mr. Nordqvist has served as manager and client liaison for natural resources, indoor air quality, vapor intrusion, storage tank compliance, water and wastewater, septic tanks, SPCC plans, microbial growth, and building condition assessment projects. Through this diverse experience, he has developed the ability to understand client needs and identify and assign appropriate resources to accomplish stakeholder goals in a professional and ethical manner. He has well established professional relationships within regulatory agencies. Mr. Nordqvist has served as Contract Manager for multiple continuing services agreement with governmental entities. Mr. Nordqvist is the QA/QC officer in responsible charge of maintaining and improving on the internal QA/QC program for GSE.

### Project Experience

- Alachua County Environmental Continuing Services Contract – Gainesville, Alachua County, Florida - Serves as the Contract Manager for this contract. Has served as the Engineer of Record for multiple Phase I & II ESAs conducted as part of County land acquisition and conservation easements. Properties have ranged in size from less than 5 to more than 4000 acres. This has included rural and urban sites.
- Ulmerton Road Development – Largo, Pinellas County, Florida. Performed Phase I/II ESA. Due nickel impacted soils & groundwater from a sandblasting operation, a SA and Remedial Action Plan was completed and approved by FDEP. The site entered into a FDEP Brownfields Site Rehabilitation Agreement (BSRA). The site received achieved closure and received a FDEP Site Rehabilitation Completion Order (SRCO). Assessment and remediation costs were partially recovered through the State Voluntary Cleanup Tax Credit (VCTC) program under the BSRA.
- The Mark Development – Gainesville, Alachua County, Florida. Provided Phase I/II ESA services related to a real estate acquisition and development. The Phase II ESA was conducted to characterize on-site potential soil and groundwater impacts related to both petroleum and solvent related contaminants. Conducted groundwater modeling to demonstrate stormwater system would not negatively influence the plume.
- Dogwood Park – Gainesville, Alachua County, Florida. Initially provided Phase I/II ESA services related to a real estate acquisition and development. Completed a Site Assessment (SA) to characterize a former landfill operated by the City of Gainesville, Alachua County, and University of Florida. GSE achieved formal site closure with restrictive covenants with approval from the Florida Department of Environmental Protection (FDEP).
- 2000 Acre Industrial Property - Alachua, Alachua County, Florida. Initially provided Phase I/II ESA services. Cleanup of agrochemical and petroleum contaminants within a former mix load area was performed. This site was granted closure through the FDEP.
- Aviation Authority – Miami-Dade County, Florida. Served as Contract Manager for a continuing services contract to provide environmental consulting. Scope included site assessments, regulatory compliance, remediation, and evaluation of environmental liabilities.

### Education

B.S., Civil Engineering, University of Florida, 1985

### Certifications

Professional Engineer Florida- 42681

### Areas of Specialization

Phase I & II Environmental Site Assessment

Environmental Assessments

Brownfields

Soil & groundwater remediation

Regulatory Compliance

Peer Review

Moisture and Mold Assessment

Subsidence (Sinkhole) Evaluations

Sinkhole Remediation

Geotechnical Engineering & Explorations

Construction Material Testing & Inspection

Field Inspections

Forensic Assessments

### Affiliations
