Background:

The amendment to the agreement extends services from Lexipol for an additional three (3) years through December 31, 2027. Alachua County Fire Rescue purchased Lexipol, an electronic system to maintain the department's policies and protocols. It replaced the department's web-based training platform in fiscal year 2022.

The Lexipol system has eliminated inconsistent and outdated policies, the issuance of new policies and training, all electronically. This allows the department to keep up with changing legislation and

practices while producing policy acknowledgement and training documentation.
