Cc Brian Lovejoy <bl@alachuacounty.us>

It can be confusing to explain. This is software license. That number is generated depending on the size of the hardware installed, but at the end it is one item; we don't receive 122 items, just one license number.

I hope this helps to understand.

Virgilio,

What are the 122 items that are on the quote for a total of \$23,546? The contract description says it is pricing from a software contract. Could you please describe for me what this actually is as we need actual hardware dollars to exceed \$15K in order to capitalize this purchase. If this is actually software then Brian probably needs to charge the entire purchase to operating accounts instead of breaking part of it out for capital.

Thank you for your assistance.

Precious,

I have 2 concerns with this PO.

1. As you can see from the snipit below, it never had a checkmark in the "myTasks" column so I never knew it was out there.

2. The "Create New Asset" box is not checked on the ZZ item. Is there a reason that it is not checked? If there is not reason, I can check it and validate before approval. However, I need you to confirm that it should be checked.

Barb,

We have entered a PO #2025-1837 for \$71,551. It is hardware equipment and software licenses to run that equipment. It has been approved up to level 3, but I want to know if it can be included in the agenda, let me know what additional information you may need. The reason for this purchase is:

Several components of the County's central storage infrastructure are scheduled for replacement due to the conclusion of manufacturer support. This storage system is a vital element of the County's network architecture, providing file and database services to all Board of County Commissioners (BOCC) departments.
