Strategic Guide:

Infrastructure

Background:

Subsurface injection and grouting is a service needed by Public Works in order to conduct underground repairs to sinkholes, roadways, and drainage structures/pipe. This method of repair reduces or eliminates the amount of excavation required and thereby reduces impact to existing facilities. Under this contract repairs can be completed in a timely manner without conducting the procurement process for each instance where work is needed.

BID 23-230 Annual Subsurface Injection and Grout Services advertised on September 14, 2022. The deadline for receipt of Bid 23-230 Annual Subsurface Injection and Grout Services was October 12, 2022; three (3) vendors responded..
