Background:

The 2025 Comprehensive Emergency Management Plan has been approved by the Florida Division of Emergency Management and must now be adopted by the Board of County Commissioners to be fully compliant.

This version of the plan accounts for the lessons learned since the last iteration of the CEMP in 2020. Since the previous plan, the Emergency Operations Center has activated for COVID-19 as well as 6 Hurricanes/Tropical Storms. The CEMP sets forth the framework under which Alachua County government will coordinate large-scale incidents.
