

Alachua County Pavement Management Program BoCC Policy Meeting

Determining the impact of weighting project selection to Areas of Inequity

April 4, 2023

Inequity Area Development

Chris Dawson, AICP
Transportation Planning Manager
Growth Management

April 4, 2023

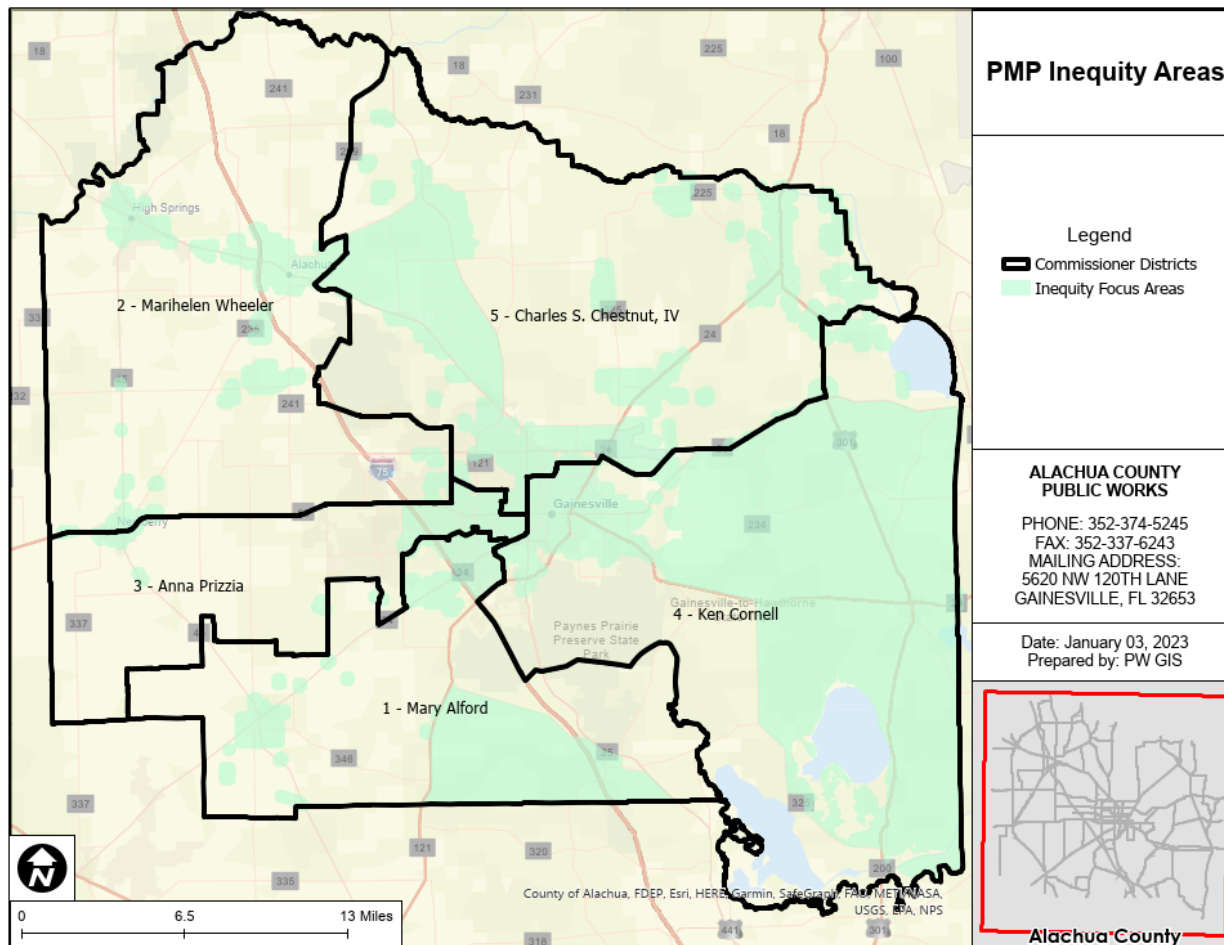

Inequity Area Development

- **Board Direction to develop a metric to evaluate equity in the pavement management program**
- **Staff utilized three metrics to identify Inequity Areas:**
 - U.S. Housing and Urban Development Qualified Census Tracts
 - 50 percent of households with incomes below 60 percent of the Area Median Gross Income (AMGI) OR
 - have a poverty rate of 25 percent or more
 - Census Tracts with Median Income <185% of Federal Poverty Guideline
 - Properties with residential improvement values in the bottom 20% of all values
 - Added a buffer of 1,320 ft.
- **Population in Inequity Area:**
 - 2020 Population is just less than 90,000, or about 1/3 of County Population
 - Includes both incorporated and unincorporated residents

Inequity Focus Area Maps

Overall Parameters

April 4, 2023

PMP Analysis Overview

Baseline Scenario (Previous)

- **Includes CIP Approved Projects for 2023**
- **Includes NE/NW 53 Avenue (US 441 to SR 24)**
- **Use the original Area of Inequity map (Properties with residential improvement values in the bottom 20% of all values)**
- **Use 40% benefit weighting to Inequity Areas**
- **Includes 3% Cost Inflation each year of the analysis**
- **No funds analyzed for Residential roads**
- **Pavement Preservation budgets @ 3% of revenue, capped at \$500,000 per year**

PMP Analysis Overview

Baseline Scenario (March 7, 2023)

- All conditions of previous slide.
- With \$200k Residential Roadways within Areas of Inequity

Run scenarios with the same total budget but adjust allocations so that:

- \$500k / year increase to Residential Roadways within Areas of Inequity
- \$750k / year increase to Residential Roadways within Areas of Inequity (Yields the Best Results)
- \$1M / year increase to Residential Roadways within Areas of Inequity

PMP Analysis Overview

Run scenarios increasing the total budget by allocating the additional budget to Residential Roadways within Areas of Inequity for:

- **\$1M / year increase to Residential Roadways within Areas of Inequity**
- **\$3M / year increase to Residential Roadways within Areas of Inequity**
- **Gradient Increase \$1M to \$5M / year increase to Residential Roadways within Areas of Inequity**
 - **Note: BoCC instructed \$500k, \$750k & \$1M, but no noticeable difference was detected**

Run what-if scenarios setting a target minimum PCI of 53 for the High-Volume roads to determine the funding reallocation needed to the Inequity Area Residentials that maximizes the PCI of those areas given the current total budget amounts.

- **\$750k / year increase to Residential Roadways within Areas of Inequity (Yields the Best Results)**

PMP Analysis Overview

Additional Scenarios

- **Allocate additional revenue to overall budget with \$750k designated to Residential Roadways within Areas of Inequity:**
 - **\$1M / year increase to Residential Roadways within Areas of Inequity**
 - **\$3M / year increase to Residential Roadways within Areas of Inequity**
 - **Gradient Increase \$1M to \$5M / year increase to Residential Roadways within Areas of Inequity**

Analysis Results

April 4, 2023

Total County Network PCI

Base Scenario – 40% Inequity No Residential (Low Volume) Funds

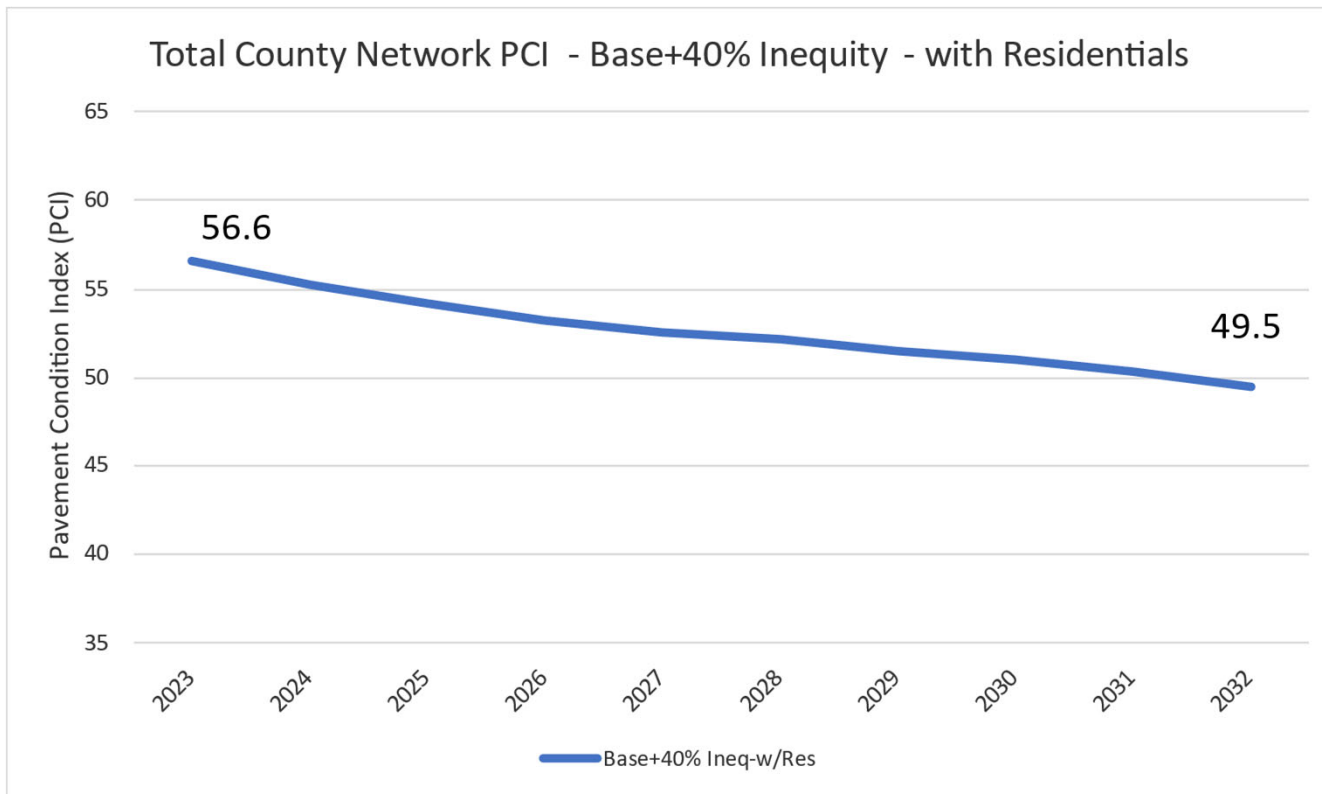

Total County Network PCI

March 7, 2023

Total County Network PCI – Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity

**2020 PCI
was 60.1**

Total County Network PCI (Residential Roads within Areas of Inequity)

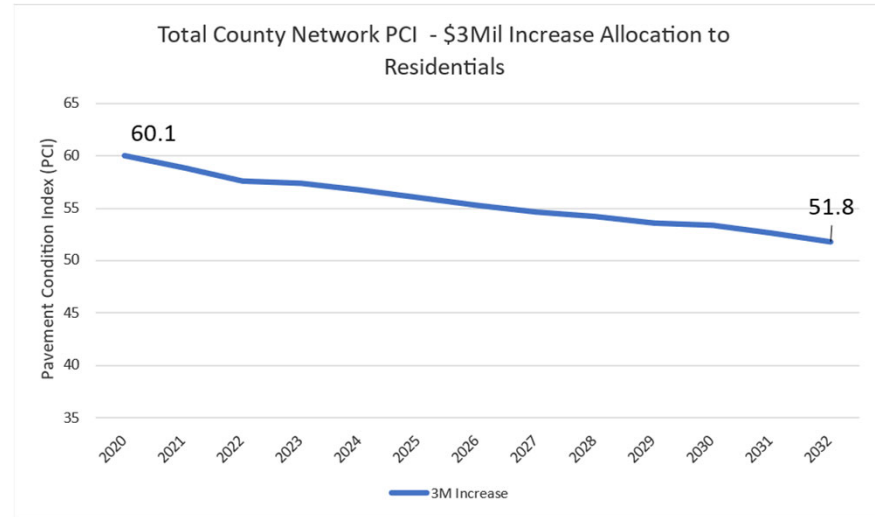

\$750k / year increase to Residential Roadways within Areas of Inequity Yields the Best Results

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- **PCI = 49.5**

Total County Network PCI (Residential Roads within Areas of Inequity)

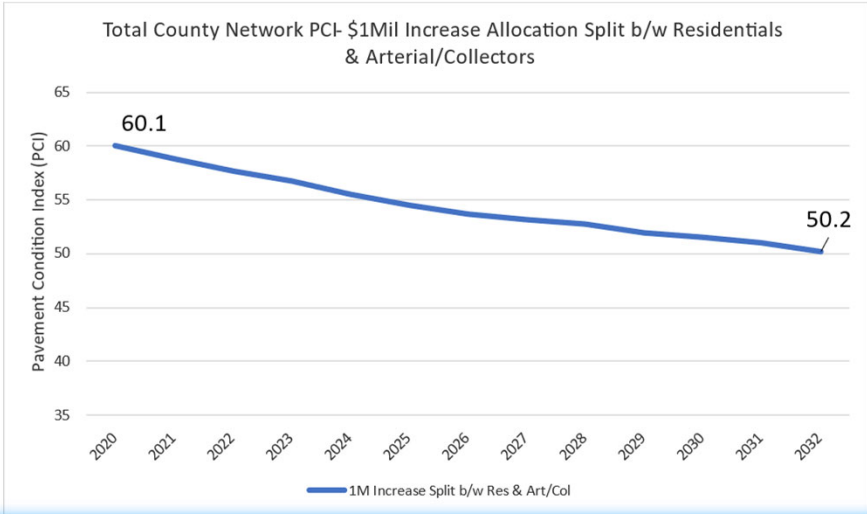

Full Allocation to Residential Roadways within Areas of Inequity:

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- PCI = 49.5

Total County Network PCI (Residential Roads within Areas of Inequity)

Allocate \$750K to Residential Roadways within Areas of Inequity and Balance to Collectors / Arterials

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- PCI = 49.5

Network Pavement Condition Index (PCI) Results

Network Pavement Condition Index (PCI) Results

- **\$750k / year increase to Residential Roadways within Areas of Inequity Yields the Best Results for Collectors / Arterials**
- **\$1M / year increase to Residential Roadways within Areas of Inequity Yields the Best Results for Residential Roadways, but Collectors / Arterials fall below 53.0**

Network Pavement Condition Index Results **Current Funding Levels**

- **\$750k / year increase to Residential Roadways within Areas of Inequity Yields the Best Results for Collectors / Arterials**

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- **PCI = 49.5**

Network Pavement Condition Index (PCI) Results

Full Allocation to Residential Roadways within Areas of Inequity:

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Network Pavement Condition Index (PCI) Results **Additional Funding**

Full Allocation to Residential Roadways within Areas of Inequity:

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- **PCI = 49.5**

Network Pavement Condition Index (PCI) Results

Allocate \$750K to Residential Roadways within Areas of Inequity and Balance to Collectors / Arterials

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Network Pavement Condition Index (PCI) Results

Allocate \$750K to Residential Roadways within Areas of Inequity and Balance to Collectors / Arterials

- \$1M for 1st 3-Years
- \$3M for 2nd 3-Years
- \$5M for Next 4-Years

Base + 40% Inequity – with \$200k Residential Roads within Areas of Inequity:

- **PCI = 49.5**

Summary

- **This is a leading-edge analysis considering Inequity – very important topic in Asset Management, but few examples available from around the US**
- **Areas of Inequity currently have a lower average PCI than rest of County network**
- **Increasing Benefit Weight to Areas of Inequity will improve the network condition (PCI) in Areas of Inequity**
- **Increasing Benefit Weight to Areas of Inequity will lower the network condition (PCI) outside of Inequity Areas**

Summary

- **Overall, the current funding does not maintain the overall network PCI. i.e. to improve the overall network, more funds would be needed**
- **Important:**
 - **This is an analysis of limited budgets, which means not all roads can be fixed.**
 - **Not all roads get selected in the analysis.**
 - **If additional revenues are allocated, or revenues exceed projections, more roads can be selected for repairs.**
